alina sireneva 🌸

full-stack js/ts developer

moscow, russia + relocate/remote 📍
work@tei.su ✉   @teibaka ✈
github.com/teidesu ⓞ

> i write code :3
> obsessed with javascript, enthusiastic about new standards and runtimes etc.
> i mainly do frontend, but also love building cool libraries and complex server stuff. also nixos <3
> would love to work on something cool, useful and fun ^_^

WORK EXPERIENCE

interface developer
november 2022 – present

Я yandex, hr tech / moscow, russia

worked on projects related to salaries and benefits

- contributed to internal ui components library
- did some frontend infra and ci/cd stuff
- improved performance and tech stack

📚 **stack**: react, redux, rxjs, vitest, hermione, storybook

PERSONAL PROJECTS

mtcute
March 2021 – present

mtproto library and bot framework in typescript, built with bundle size and performance in mind.
features support for most mainstream runtimes, robust end-to-end testing and full type safety.
built a network abstractions library to seamlessly support all runtimes

plashiki
May 2019 – July 2021

anime piracy website >:3

built an extensible parsers engine to scrape videos from a lot of websites and aggregate them.
made an spa to handle all that, with a custom video player for websites that don't have one, and a
moderation panel to manage the library and handle user-sent reports/suggestions.

had to close the project because it grew to a scale that was hard to maintain alone

📚 **stack**: typeorm, postgres, redis, koa.js, vue 2, vuetify, vuex, scss

protoflex
Early 2021

javascript library for arbitrary protobuf messages, built to aid in exploring undocumented apis

other
ever since 2015

a few telegram bots with varying complexity; some small frontend apps for personal use and more

---

KEY SKILLS

🎨 **frontend:** react (next, remix, tanstack); webpack, vite, astro, ssr/ssg, webassembly, webrtc
🏩 **backend:** node.js (nestjs, fastify); postgresql (typeorm, drizzle); telegram bot api, mtproto
⚙ **various:** reverse engineering; eth, metamask; ci/cd, linux, nixos; git, graphql
💬 **languages**: english (c1), russian (native)
