

Cloud-Based Security Solutions for the Smart and Connected City

Protect people and critical infrastructure with next-gen security technology and AI-driven analytics.

Leading cloud-based physical security

Verkada is #1

in cloud video security & cloud access control**

Cities today face evolving challenges, from public safety concerns to managing operations with limited resources. By adopting cloud-managed tools and real-time data, they can improve situational awareness, respond faster to incidents, and collaborate more effectively to ensure safer communities.

38% reduction
in major crime rates*

70% faster installation
and immediate ROI*

Time-to-lead reduced
from days to minutes*

*As estimated by the customer. Prior results do not guarantee outcomes.

**2023 Novair Insights market share data for video surveillance cloud solutions (world excl. China). 2024 Omdia worldwide market share data for cloud-native, access control solutions that push mission-critical services into the provider's cloud tenancy; excludes ACaaS solution providers that materially split the execution locus for analytics between on-premise hardware and cloud.

Why cities and municipalities choose Verkada

Experience a new level of simplicity with Verkada. All you need is the hardware and access to Command, our software platform, which updates automatically. Centrally manage all Verkada devices and users from any browser or mobile device. Gain actionable insights with information integrated across devices.

Access footage from anywhere and rapidly investigate with AI-powered search

Empower city personnel and staff with a user-friendly and intuitive interface

Enable monitoring anywhere with solar-powered security trailers

Instantly share live camera feeds with first responders via SMS or a direct link

IT-friendly with bandwidth-efficient cameras and no DVRs/NVRs to upkeep

Easy access management with granular user permissions

Up to 10-year warranty, predictable renewal costs, and unlimited user seats

Top-rated technical support — available 24/7 via email, phone, or live chat

High-level security and compliance — enterprise-grade encryption, SOC 2 Type 2, ISO 27001/27017/27018/27701, TAA/FY2019 NDAA-compliant, and FIPS-validated camera models

Built on Zero Trust principles with enhanced user security such as SSO, MFA, and SAML authentication

City of Las Vegas

“Beyond just security, Verkada provides us with actionable insights through computer vision technology. With data-driven analytics, we are always finding ways to drive efficiency and optimize our operations.”

Michael Sherwood,
Chief Innovation Officer

City of Los Angeles

“Verkada ties security together for us in one complete package that’s easy to use and manage. We have a modern cloud-based solution, direct support from a highly responsive team, and smart analytics to protect our citizens.”

Jerry Morris,
Communications Manager

Centralize management across all sites and reduce complexity

Accelerate investigations and reduce crime

- Locate footage of suspects or vehicles in seconds with reverse image search, license plates, or plain-text descriptions. Instantly reconstruct a timeline of events and compile video clips into incident reports with AI-powered summaries.
- Get immediate SMS alerts when people or vehicles of interest are detected across your cameras. Quickly share footage with police via SMS or a direct link to enable rapid response.

Streamline facility access at scale

- Easily manage hundreds of doors across municipal buildings through a single cloud-based platform, with automated credential provisioning and flexible entry options such as keycards, mobile credentials, or license plate recognition.
- Empower libraries and community centers to expand specialized programs by remotely controlling facility access and door schedules, reducing the need for onsite staff.

Simplify multi-site security operations

- With Verkada's leading cloud-based physical security system, easily oversee city security operations from anywhere, including installation, user access, and troubleshooting — unifying visibility across all your locations.
- Help keep your data secure with robust cybersecurity measures: enterprise controlled encryption (ECE), multi-factor authentication (MFA), and single sign-on (SSO).

Easily deploy remote monitoring

- Set up cameras in hard-to-wire areas using compact cellular gateways or fast-to-deploy, solar-powered security trailers.
- Seamlessly deliver power and data to cameras to monitor remote areas like roads, wastewater treatment plants, and public parks to detect illegal activity or assess weather conditions in real time.

Enhance community safety with proactive detection and deterrence tools

Government, civic, and judicial buildings

- Use video intercoms at entryways to screen visitors and deter potential threats, providing an added layer of safety, especially for offices with limited onsite staff.
- Prevent unauthorized access to restricted areas in city halls, and public service offices with role-based permissions. Easily access logs and visual records of door events to support investigations and maintain security.
- Install panic buttons in strategic locations throughout courthouses and municipal buildings, allowing staff to alert security or the police in response to threats.

Parks and recreation centers

- Easily install cameras with cellular gateways for remote connectivity, enhancing security at parks, sports fields, and other unsupervised facilities.
- Capture clear, high-quality footage (up to 4K resolution) even in low-light conditions using cameras equipped with long-range infrared and advanced night vision.
- Automatically detect vandalism and illegal dumping at remote sites, triggering AI voice warnings through horn speakers to stop offenders before damage occurs.

Libraries and community centers

- Empower data-driven decisions about staffing and space utilization with cameras that provide integrated people counting and detailed foot traffic analytics.
- Streamline front desk operations with Verkada Guest, simplifying sign-ins for events and activities with automated photo ID capture and integrated badge printing.

Police and fire departments

- Verkada's integration with Axon Fusus enables police departments to view Verkada video data from a single view to enable faster investigations.
- Quickly deploy mobile monitoring units to remotely oversee high-risk fire zones, outdoor events, and crime hotspots.
- Cloud-based access control with integrated video security enables tight control of station doors and restricted areas.

Protect public infrastructure and help ensure regulatory compliance

Street intersections and public transit hubs

- Deploy LPR-enabled bullet cameras along with context cameras on streetlights to monitor moving traffic and capture license plates, giving law enforcement live situational awareness for quick, effective responses to crimes and accidents.
- Maximize coverage with Verkada pan-tilt-zoom (PTZ) cameras, which can monitor expansive areas such as street intersections, transit terminals, and municipal airports. Sentry mode automatically detects and zooms in on individuals, capturing high-resolution images for clear identification.

Utilities and public works

- Operators can keep an eye on important infrastructure like wastewater plants and waste sites, checking system performance without having to be on site.
- Automatically track door access and revoke credentials when employees leave to safeguard sensitive areas.
- Protect sites with modern intrusion sensors and AI-enabled cameras that instantly detect trespassing.

Disaster and emergency management

- Centralized security operations improve emergency coordination, allowing teams to remotely manage security systems, even while on the go.
- Monitor storm impacts, check flood barriers, and track evacuations in real time from any browser or mobile device. Instantly share live camera feeds with FEMA and first responders to support disaster response and recovery.
- Easily grant emergency personnel access to critical facilities by remotely unlocking doors with a single click.

Municipal jails and detention centers

- Built for tough jail environments, Verkada cameras continue to record even during internet outages. Easily monitor up to 300 camera feeds at once with viewing stations, providing real-time visibility and enabling rapid incident response.
- AI analytics, including face and text-based search, enable detention officers to quickly investigate incidents like inmate fights or altercations.

One platform to simplify city security

Video Security

AI-enabled, bandwidth-efficient cameras provide 24/7 recording, up to 365 days of onboard storage, and industry-leading image quality. No DVRs or NVRs are needed — just install via PoE.

Intercom

Protect and monitor entrances and lobbies — answer calls from anywhere with sharp video, clear audio, and four smart receiver methods.

Guest

Simplify visitor check-ins or sign-ins for events with automated photo ID capture and integrated badge printing.

Access Control

Manage hundreds of doors and employee credentials at scale with easy-to-deploy controllers and cloud-managed access control software.

Air Quality Sensors

Monitor IT rooms and public areas with real-time alerts for noise, vape emissions, TVOCs, formaldehyde, temperature, humidity, and air quality.

Alarms

Catch trespassing and break-ins with cloud-managed alarms and intrusion detection. Reduce emergency response times with built-in 24/7 professional monitoring and video verification.

Connectivity

Easily deploy Verkada cameras with gateways that deliver power and data in hard-to-wire locations like parking lots, parks, and remote infrastructure.

Viewing Station

Stream up to 300 live camera feeds from multiple locations into a single command center, providing real-time visibility across city-owned properties.

Security Trailer

Solar-powered trailers deliver AI video security, ALPR, and crime deterrence wherever needed, regardless of power or network availability.

Try Verkada for free

Our 30-day free trial includes a device, two-way shipping, and full access to the Command management platform. Learn how we can support your smooth transition to the cloud by bridging non-Verkada devices to our cloud-based system.

Trusted by cities and municipalities
