FEATURES

ADAPT Fleet

TRACKING DRIVING ACTIVITIES AND MEASURING CARBON FOOTPRINT.

ADAPT Fleet automatically detects driving trip activities and measures the carbon emissions without installing hardware device to the vehicle. This allows your company to automatically calculate your carbon emissions from your fleet operation. The calculation is based on international standards developed by the Intergovernmental Panel on Climate Change (IPCC) of the United Nations and follow the GHG protocol developed by the World Resources Institute and the Climate Registry. This is the same standard that major governments and large corporations follow.
