Jazz

 Pakistan's leading telecommunication company

Our collaboration with Jazz, the top telecommunications provider in Pakistan, aimed to optimize its operational efficacy and overall IT infrastructure through the implementation and management of a SharePoint intranet portal integrated with their HR system and comprehensive technical support. With the overarching objective of delivering high-quality services to build long-term relationships, our team embarked on building a tailored solution to meet Jazz's specific needs.

Key Highlights of the Project:

- Build a tailored intranet portal for Jazz, facilitating internal communication, collaboration, and document management.
- Integrated Jazz's HR system with the intranet portal for streamlined employee data management and HR processes such as employee data management and performance evaluations.
- Providing ongoing technical support to optimize Jazz's network, servers, systems, and applications, ensuring operational efficiency.
- A dedicated technical support team, ensuring prompt resolution of IT issues, minimizing downtime, and maintaining user satisfaction.
- Implemented stringent security protocols to safeguard sensitive data and ensure compliance with regulatory requirements, mitigating cybersecurity risks.
- Regular monitoring and evaluation enable continuous improvement to adapt to evolving business needs and technologies.

PDO-Portal

Our Sharepoint Online intranet portal for Petroleum Development Oman (PDO) serves as a centralized platform for seamless communication, collaboration, and information sharing among team members. Tailored to PDO's unique needs, the intranet enhances productivity, fosters transparency, and drives operational efficiency, reinforcing PDO's commitment to excellence and sustainable value creation.

Kafalah-Portal

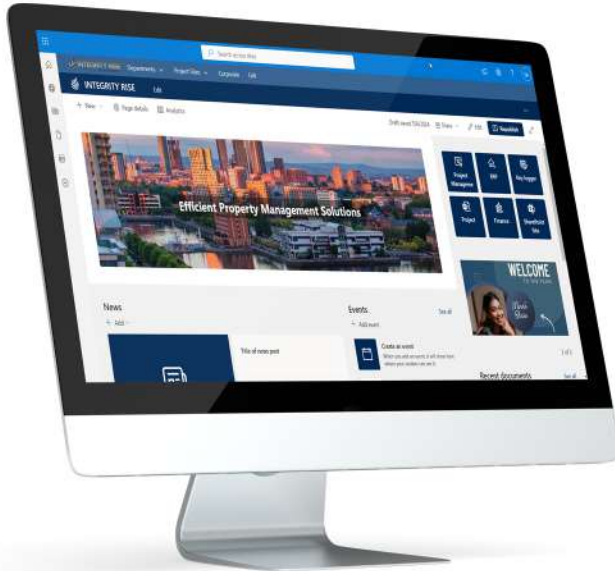

We collaborated with Kafalah to create a tailored SharePoint Online intranet portal, enhancing communication and operations. This solution supports Kafalah's leading financing risk guarantee program in the Kingdom and solidifies its position in the Middle East. Our expertise ensures seamless integration, facilitating efficient collaboration and information sharing among team members, ultimately driving success in the financial industry.

INTEGRITY RISE

Property Management Solution

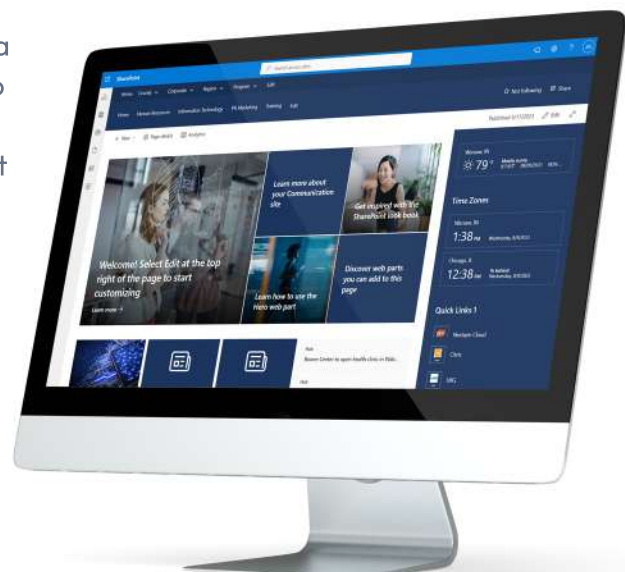

This project aims to develop a comprehensive intranet portal to streamline property management processes. The portal will facilitate efficient communication, simplify task management, and provide easy access to essential property information. By integrating various functionalities into one cohesive platform, the solution is designed to enhance productivity, improve tenant relations, and support managers in effectively overseeing multiple properties. The intuitive design and robust features ensure an excellent user experience.

Health Clinic Portal

A dedicated intranet portal for a renowned health clinic to enhance internal operations, this project will streamline communication, simplify administrative duties, and provide easy access to important clinic and patient information.

By bringing all essential tools and resources into a single, user-friendly platform, the project aims to boost staff productivity, improve coordination among healthcare providers, and ensure efficient clinic management.

Pet lab Co. Intranet

A dynamic hub designed to optimize internal communication and operational efficiency, this project integrates a user-friendly document management system, streamlined HR tools, and engaging content channels. With quick access to vital resources and dynamic features like articles and event announcements, it cultivates a connected and informed workplace, driving productivity and collaboration across the organization.

Martin Dow Employee Portal

The Martin Dow Employee Portal project aims to create a comprehensive SharePoint-based intranet solution to enhance internal communication, streamline access to company resources, and foster employee engagement. Featuring a user-friendly dashboard, the portal provides quick access to essential applications, the latest news, events calendar and multimedia content. This project will improve resource accessibility, collaboration, and overall efficiency within Martin Dow, ensuring employees are well-informed and connected.

Good to Great School

Intranet Portal and Task Management System

This project involved creating a SharePoint intranet portal and task management system for Good to Great School. The intranet portal serves as a central hub for communication, collaboration, and resource sharing among faculty and staff, providing seamless access to documents, announcements, and event calendars. The integrated task management system streamlines workflow processes,

allowing users to efficiently create, assign, and track tasks, ensuring accountability and transparency. By leveraging SharePoint's capabilities, this solution optimizes internal operations, fosters collaboration, and supports the school's mission to achieve excellence in education delivery.

Employee Portal

We built this comprehensive digital workplace for Conti Federal using SharePoint Intranet to create a comprehensive internal platform that enhances internal communication, improves resource accessibility, and fosters employee engagement. It serves as a centralized hub for company news, project updates, HR-related information, and employee recognition, fostering a cohesive and efficient work environment.

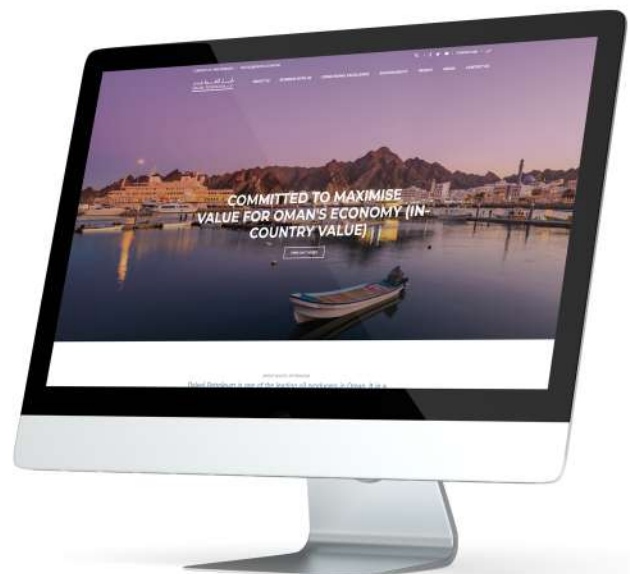

Omanoil-Portal

Crafted a tailored SharePoint Online intranet portal for Oman Oil Marketing Company SAOG (OOMCO), streamlining communication and collaboration across departments. This centralized platform supports OOMCO's fuel marketing operations, including fuel retailing, direct sales, lubricants, aviation refueling, and distribution. By consolidating resources and tools, the intranet boosts efficiency and empowers employees to fulfill their roles effectively.

Daleel Petroleum-Portal

We partnered with Daleel Petroleum, a leading oil producer in Oman, to develop their SharePoint Online intranet portal. Designed for seamless communication and enhanced operational efficiency, the portal reflects Daleel Petroleum's commitment to excellence, technology adoption, and ethical business practices.

EIA - Intranet

Our SharePoint project for the Emirates Investment Authority (EIA) showcases a modern and intuitive intranet solution tailored to enhance internal communication and collaboration. This project reflects our commitment to delivering high-quality, user-centric digital workplaces that streamline access to essential information and foster a connected organizational environment. The EIA SharePoint site effectively supports the authority's goals by providing a centralized platform for seamless information sharing and employee engagement.

جهاز الإمارات للاستثمار
EMIRATES INVESTMENT AUTHORITY

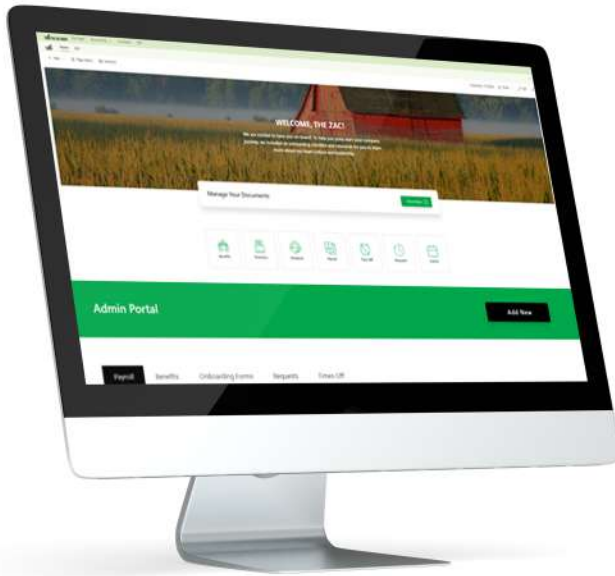

Ensemble - Intranet

This project for Ensemble demonstrates our expertise in developing a sophisticated and functional intranet solution tailored to the unique needs of organization. The site features a sleek design that highlights key areas such as hospitality, multifamily, life sciences, and commercial projects. With seamless navigation, real-time weather updates, event creation capabilities, and a news section, this platform ensures effective communication and engagement across the company.

Employee Portal

Leveraging SPFx, our Employee Portal grants easy document access and enables staff to request reimbursements and time off. The Admin Portal empowers administrators to efficiently manage benefits, respond to requests, and oversee company-wide information, fostering seamless communication and productivity.

Old Age Home Management System

The old-age home system improves operational efficiency and resident care by tracking resident details and scheduling tours. It provides real-time insights and streamlines processes, allowing staff to provide personalized care and enhance the overall experience for residents and caregivers.

Intranet

Our project for Queen Square Imaging Center Hospital involved crafting a dynamic intranet employee portal on SharePoint. Featuring a hub site structure, it seamlessly integrates department-specific sub-sites, providing a centralized platform for effective communication and collaboration. The portal enhances workflow efficiency and fosters interdepartmental connectivity within the hospital's digital ecosystem.

Employee onboarding App

Our responsive Power Apps project offers a streamlined user experience. Users input their information on one screen, then transition to the next screen, dynamically fetching data from the database. Here, certain details are non-editable, providing data integrity, while others remain customizable.

The app also prompts users for additional company-required information, enhancing the completeness of user profiles.

HR Intranet Portal

This project involves creating an Intranet Portal tailored for HR purposes. It will centralize employee data management, streamline event organization, facilitate payroll processing, optimize resource management, and provide a secure repository for document storage.

New Hire App

This PowerApp streamlines the new hire process by automating tasks. It sends emails to approvers for new hire approval, generates employee offer letters upon approval, and automatically sends them to the new hire's email address.

HSE Document Simplification

Health, Safety, and Environmental Management System (HSE MS)

TDemonstrating our capability to design comprehensive document management solutions, this project aims to streamline access to vital policies, procedures, and checklists, ensuring compliance with stringent operational and safety standards.

The site is tailored to facilitate easy access to essential documents, including codes of practice, policies, procedures, and checklists, all categorized for efficient navigation. This project showcases our ability to create functional SharePoint environments that support critical operational standards and regulatory requirements.

شركة تنمية نفط عُمان
Petroleum Development Oman

Survey App

Our property-focused project revolutionizes property survey processes. It efficiently manages multiple activities associated with each property, providing a comprehensive overview. Users can seamlessly navigate through survey tasks, ensuring a systematic and thorough examination of each property. This solution enhances property management with streamlined survey workflows.

We listen. We advise. We design, together.

Happy customers & ongoing relationships are what we strive for. Success is measured by results, the most important being how our clients feel about their experience with us.

THANK YOU

FOR YOUR BUSINESS.

The foundation of our company is laid on the basic principle that "Our Clients are Our Partners" - this drives the organization to keep the focus towards continuous process and product improvement.
