# About Us

**Hola Tech** is a global software development company located in Vietnam, and we focus on delivering high-quality services in areas like Blockchain and AI. With a team of **200+ skilled professionals**, we pride ourselves on creating innovative software solutions that meet our clients' needs.

We offer a range of services including Blockchain Development, AI & Machine Learning, Web/App/Game Development

Over the years, we've successfully completed 300+ projects across different sectors such as DeFi, NFT, Real Estate, Banking & Finance, Education, Media & Entertainment, Retail & Ecommerce, Automotive, Insurance, Health Care, and Logistics. This diverse experience allows us to understand various industry challenges and deliver effective solutions.

Our clients come from around the globe, primarily from the EU, the US, Middle East and Asia, and they trust us to bring their ideas to life with our dedicated and talented team. At Hola Tech, we're excited about making technology work for you!

# Awards & Recognitions

# Horizon Of Limitless Advancements in Tech

# Our services

## 1. Blockchain

- Smart contract development
- DApp building
- Custom Chain & Ecosystem
- Crypto Wallet development
- Tokenization & ICO development
- Cryptocurrency Mining/Exchange

## 2. AI & Machine Learning

- Machine learning model training
- NLP & chatbot development
- Computer vision solutions
- Predictive analytics
- Big data
- Workflow automation

## 3. Web/App Development

- Custom Website Development
- Cross-platform mobile app
- Content Management System (CMS)
- Native mobile app development
- Front-end Design & Development
- Complex Backend Systems with
- API Integrations
- Payment integration

## 4. Cloud Solutions

- Cloud infrastructure setup
- DevOps & CI/CD pipelines
- Serverless architecture
- Cloud security and monitoring
- Cloud/Database migration

# Our services

## 5. QA & Testing

- Manual test case execution
- Automated testing
- Load & performance testing
- Bug tracking and reporting

## 6. Custom Software

- Custom software development
- API integration & development
- Legacy system modernization
- SaaS product engineering
- ERP system development
- CRM Software

## 7. IT Consulting

- Tech stack evaluation
- Product-market fit analysis
- MVP strategy consulting
- Agile workflow implementation

## 8. Game Development

- Game design & prototyping
- Cross-platform development
- In-app monetization systems
- Multiplayer server setup

## Why we do it?

Founders in the Blockchain and AI/ML industries face considerable many challenges today, often forced to rely on limited resources or prioritize cost optimization within their IT departments.

Given the increasingly competitive global market and the high costs of developers and outsourcing, it becomes difficult for these founders to create sustainable, scalable solutions while delivering real value.

Our mission is to bridge this gap by providing them access to skilled talent and offshore development opportunities. This approach not only helps them optimize their budgets but also enables us to gain valuable experience and build long-lasting trust within the industry.

# Tech Stack

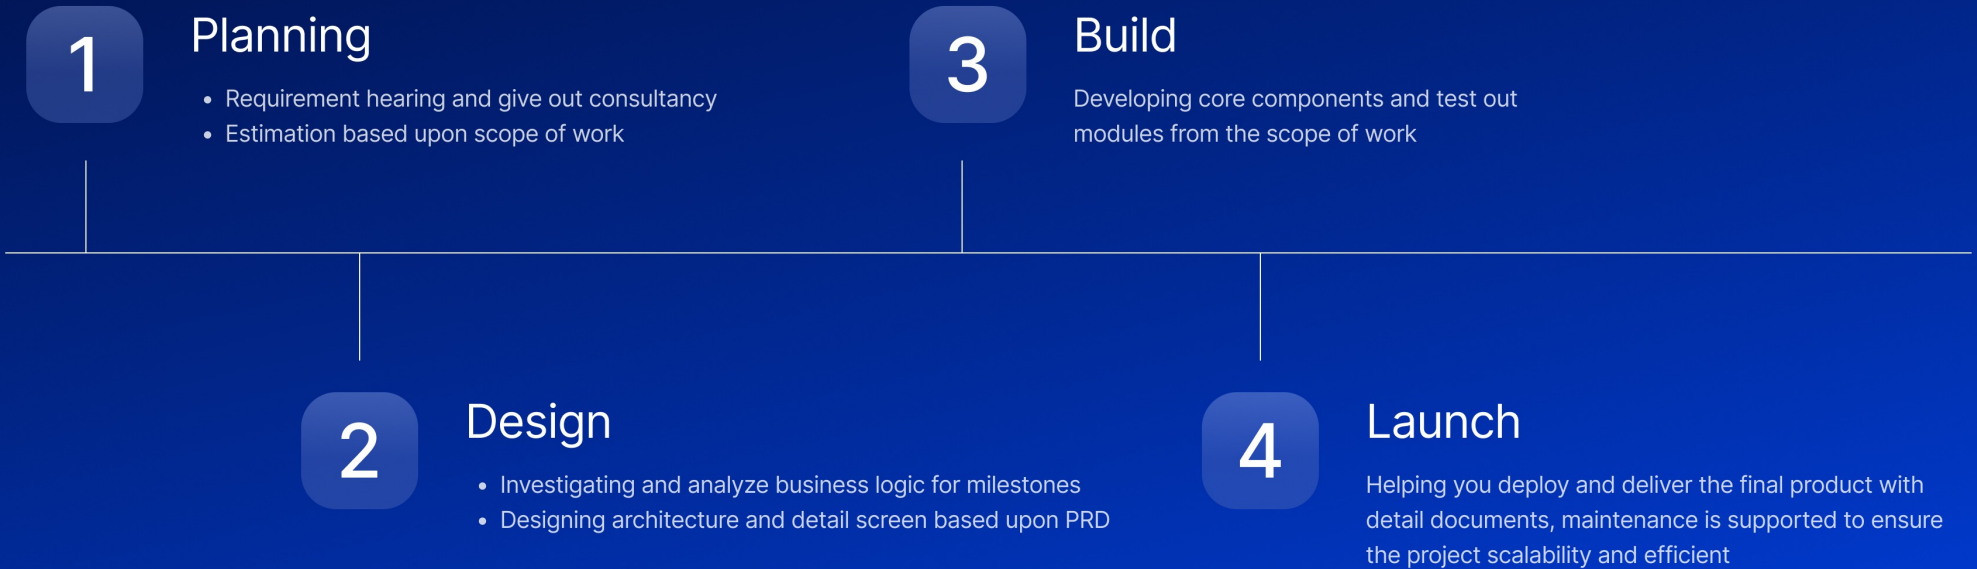

From our extensive knowledge of working mainly in the global market

We've gathered comprehensive knowledge in terms of modern frameworks and stacks to ensure the scalability of the projects.

Our R&D Department always prioritize the newest tech possible for your solutions

# Workflow

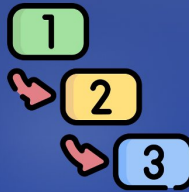

# Development Methodologies

Overview of three popular software development approaches—Agile, DevOps, and Waterfall—highlighting their workflows, strengths, and key benefits.

## Agile development

- ✓ Mitigates the risk of budget blow outs
- ✓ Better product/market fit
- ✓ Increased stakeholder collaboration
- ✓ Get to market faster
- ✓ More value, less time

## Waterfall Development

- ✓ Uses clear structure
- ✓ Determines the end goal early
- ✓ Issues addressed during design
- ✓ Crystal clear outcomes
- ✓ No financial surprises

## DevOps Development

- ✓ Enhance collaboration and trust
- ✓ Release faster and work smarter
- ✓ Accelerate time - to - resolution
- ✓ Better manage unplanned work

# Work Models

Choose the right model for your project goals. Whether you need end-to-end delivery, team extension, or a flexible mix of both — we've got you covered with tailored solutions that fit your timeline, budget, and scope.

## Project-Based

You hire a team to complete a fixed project with clear scope, timeline, and cost. Everything is planned upfront.

- ✓ Cost Efficient
- ✓ Fast Delivery
- ✓ Tailored work

👉 Best for: Clear scope & fixed budget

## Staff Augmentation

You add external developers or team members to support your in-house team. They work as part of your team.

- ✓ 100+ developer
- ✓ Fast Ramp-up
- ✓ Save Budget

👉 Best for: Scaling your in-house team

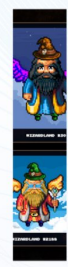

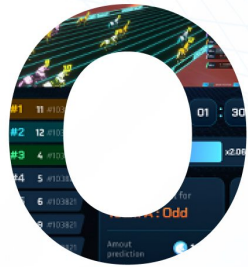

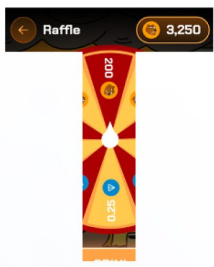

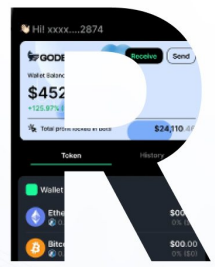

## Hybrid

A mix of both models: some work is fixed-scope, some is handled by added team members.

- ✓ Flexibility
- ✓ Optimization
- ✓ Adaption

👉 Best for: Flexible & evolving needs

# PORTFOLIO

# Stack

Stackit.ai is a platform designed to enhance your cryptocurrency investments by allowing you to borrow against your crypto assets without the risk of liquidation.

This approach enables you to utilize your funds for additional investments or expenditures while your original crypto holdings continue to appreciate.

By safeguarding against liquidation, Stackit.ai ensures that your assets remain secure, providing a stress-free experience as you grow your wealth.

# PreBuild

PreBuild is an AI-powered workspace designed for developers to write, run, and test code directly in the browser—no setup needed. It features a built-in AI assistant to help generate and explain code, plus real-time collaboration so multiple devs can work together seamlessly. You can share live projects instantly via link, making it ideal for demos, interviews, and team coding. With intuitive project management, built-in terminal, and pre-configured environments, PreBuild is a powerful all-in-one space for modern development.

# FANPAD

FanPad is an innovative IDO (Initial DEX Offering) launchpad tailored for the Fantom blockchain ecosystem.

It offers comprehensive support to emerging projects, including fundraising, technical assistance, tokenomics advisory, audits, and marketing through strategic partnerships.

FanPad employs a fair distribution mechanism that considers factors like loyalty and user activity, ensuring equitable token allocation among participants.

## Technology Stack

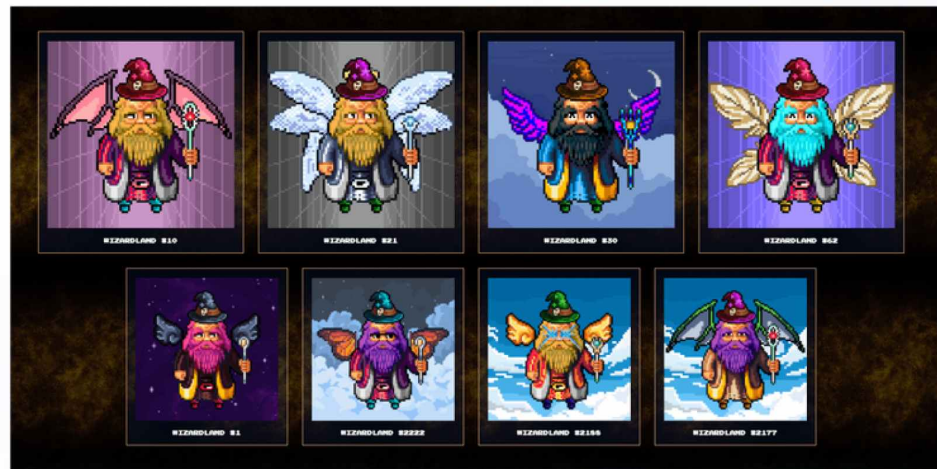

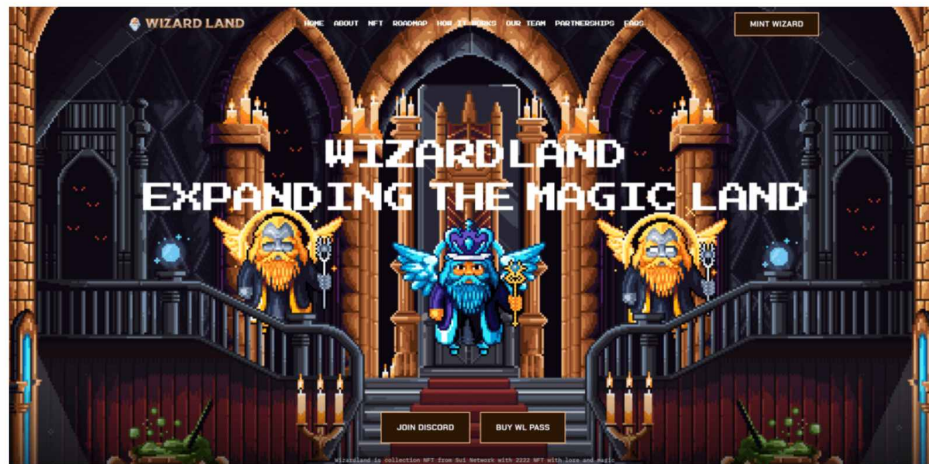

# WINZARD LAND

Wizard Land Sui is an NFT project built on the Sui blockchain, offering a magical fantasy-themed experience where users can mint, trade, and evolve dynamic NFTs such as wizards, spells, or artifacts.

Leveraging Sui's high-speed, low-cost transactions and Move-based smart contracts, the platform integrates decentralized storage, gamification, and assets to create an engaging ecosystem for collectors and players.

It features an in-game token economy, NFT marketplace, and community-driven events, blending blockchain technology with immersive storytelling.

## Technology Stack

# FullDAO

FullDAO is a decentralized autonomous organization designed to empower communities by providing tools for collective decision-making, resource management, and governance.

Built on blockchain technology, FullDAO facilitates transparent voting, equitable token distribution, staking, and automated smart contract execution, enabling seamless collaboration across diverse groups.

The screenshot displays the KAIDEX lending platform interface. At the top, there is a navigation menu with links for Supply, Borrow, Portfolio, Staking, and Documentation. A user profile section shows 'KARDIA' and a 'Connect Wallet' button. Below the navigation is a summary dashboard with four key metrics:

| Total Supply     | Borrow           | Available Liquidity | Total Treasury  |
|------------------|------------------|---------------------|-----------------|
| \$994,829,399.12 | \$366,829,345.33 | \$456,345,399.12    | \$16,345,399.45 |

Below the dashboard, a banner reads: "Earn \$KAI rewards by supplying and borrowing assets on KAIDEX".

The main content area is titled "SUPPLY ASSETS" and contains a table with the following columns: Name, Rewards, APY, Deposits, Liquidity, and USD Value.

| Name           | Rewards | APY   | Deposits | Liquidity | USD Value |
|----------------|---------|-------|----------|-----------|-----------|
| USDF \$ 1.00   | 📈       | 7.88% | \$5.5 M  | 15.9 M    | \$55.5 M  |
| USDC \$ 1.00   | 📈       | 7.88% | \$5.5 M  | 15.9 M    | \$55.5 M  |
| DAI \$ 1.00    | 📈       | 7.88% | \$5.5 M  | 15.9 M    | \$55.5 M  |
| STNEAR \$ 4.06 | 📈       | 7.88% | \$5.5 M  | 15.9 M    | \$55.5 M  |
