Vulnerability Exposure

Tenable Vulnerability Management Introduction On-Demand Training

Tenable University

Tenable Vulnerability Management Introduction Course

The Tenable Vulnerability Management (TVM) Introduction Course consists of several short lessons that provide the fundamental building blocks for deploying, configuring, and operating the cloud-based Tenable solution for vulnerability management. The TVM Introduction Course is available at no cost from Tenable University.

Overview

This course is available as an On-Demand Training (ODT). Tenable presents basic features of the Tenable Vulnerability Management platform. Content includes key initial configuration settings such as tags, sensors, and access control; asset discovery scanning; vulnerability and compliance assessment; and analysis and reporting for all discovered assets and findings, using dashboards, exports, and reports.

The course features a blend of interactive lessons and demonstrations, all designed to promote active engagement and enhance learning outcomes.

Audience

The Tenable Vulnerability Management Introduction Course is suited for professionals interested in learning the basic operational use of Tenable Vulnerability Management.

Prerequisites

None.

Key Benefits

→ **Product-based Demonstrations**

View practical, real-world demos showing Tenable products in realistic scenarios.

→ **On-Demand Scheduling**

Short, self-paced lessons are available on your schedule at Tenable University.

→ **Strong Foundational Knowledge**

Complete this course before progressing to the Virtual Instructor-Led Training (VILT) or On-Demand Training (ODT) Tenable Vulnerability Management Specialist Course.
