Where did the data come from ?

The data comes from - <https://www.howbad.info/>

The data was taken from the U.S. database - **VAERS**

Data source: the authors at <https://www.howbad.info/> they write that :

US data : All data are from VAERS, a public database of over 700,000 adverse reaction reports for Covid 19 vaccines from Moderna, Pfizer and Janssen in the US.

Foreign data : The VAERS database now also includes data for Moderna, Pfizer and Janssen Covid 19 vaccines in countries outside the US.

This data can be found here -. [Vaccine Adverse Event Reporting System \(VAERS\)](#)
Vaccine Adverse Event Reporting System (VAERS)-the last table listed.

This non-domestic data was provided by foreign regulatory agencies and consists of approximately 1,000,000 adverse reaction reports.

Our intent is to present the VAERS data in an accessible and unadulterated form that can be easily verified using the links below

Vaccine Adverse Event Reporting System (VAERS)
[Vaccine Adverse Event Reporting System \(VAERS\)](#)

Video Tutorial 1:

Extracting bad batch data from VAERS - deaths, disabilities, hospitalizations

[Video Tutorial 1 : Extracting Bad Batch Data from VAERS - Deaths, Disabilities, Hospitalisations](#)

The data includes vaccine series from the United States and from outside the United States.

Method of sorting the series

The data were extracted and properly sorted into sub-series and series in tables .

SUBSERIES - is a sequence of the first 2 characteristic characters from the vaccine lot number

EJ EK EL EN EP ER EW FA FC FDFE FF

SERIES - is a sequence of the first 6 characteristic characters derived from the vaccine lot number

**EN5318 ER1741 EL1283
EN6198 ER8727 EL1284
EN6199 ER8729 EL3246**

The data had to be systematized as follows, due to the fact that in the description of a given vaccine batch number there were sometimes different characters and letters before the correct batch number, e.g.

the number that appears in the series	original vaccine batch name	the number that appears in the series	original vaccine batch name
EL3247	1111-20-EL3247	EN6201	1ST:EN6201, 2
EL9262	1111-20-EL9262	EP6955	1ST:EP69552ND
EL9264	1111-20-EL9264	ER8733	1ST:ER87332ND
EN9581	1111-20-EN9581	1STDOS	1STDOS
EP7534	1111-20EP7534	1STDOS	1STDOS:7533
ER8737	1111-20-ER8737	1STDOS	1STDOS:SOQUEL
EW0153	1111-20-EW0153	EW0153	1ST-EW0153AND
EW0167	1111-20-EW0167	EW520	1STLOT#EW520
EW0171	1111-20-EW0171	1W0153	1W0153
EW0177	1111-20-EW0177		
EW0179	1111-20-EW0179		
EW0182	1111-20-EW0182		

Where possible, series numbers were extracted and assigned next to the original name

I have tried not to omit the number

but here is an example that I skipped SE:7533

Probably there were still a few that were omitted.

There are **12,021** pure original names, and after checking this number we were able to reduce it to **9228** series, so the number was reduced by a little less than 3000. One can only guess why the series were scattered with additional descriptions at the time of submitting to VAERS - maybe to reduce the harmfulness of the subseries.

All this information about US series and non-US series is contained in an excell file called Pfizer TABLE

There is also an excell file called Pfizer CHARTS in which you can sort the data by column , and the charts will change .

Each time before sorting columns A,B,C you have to sort column D from max to min , then sort by A or B or C.

Then the graphs show up correctly.

DETAILED ANALYSIS OF THE - PFIZER - VACCINE SERIES BASED ON VAERS DATA

Preliminary Data - Description. No. 1 of 6.

RELIMINARY DATA ON VACCINE SUB-SERIES AND SERIES - PFIZER

SERIES - is a sequence of the first 6 characteristic characters derived from the vaccine lot number

All series numbers are **9228**

SUB-SERIES - is a sequence of the first 2 characteristic characters from the vaccine lot number

All subseries numbers i.e. ER , EN etc. Are **733**

	SUB-SERIES		SERIES	
The first 12 subseries have 3565 series in them	12	1,64%	3565	38,63%

Another 11 sub-series have 1148 series in them	11	1,50%	1148	12,44%

Another 26 sub-series have 926 series in them	26	3,55%	925	10,02%

Another 684 subseries has 3590 series in it	684	93,32%	3590	38,90%

TOTAL	733	100%	9229	100%

2 character beginning of series	6 characters number series	Adverse Drug Reactions - ADRs	DEATHS	DISABILITY	LIFE THREATENING
ALL SUB-SERIES	ALL SERIES	TOTAL	TOTAL	TOTAL	TOTAL
733	9 228	326 222	7 873	14 499	9 194

ADVERSE DRUG REACTION - ADR

ADR - from English

Adverse Drug Reaction (ADR). (Definition adopted by WHO in 1972)

DETAILED ANALYSIS OF THE - PFIZER - VACCINE SERIES BASED ON VAERS DATA

Preliminary Data - Description. No. 2 of 6.

TOXICITY PREFERENCE - Summarized Sub-series from the most toxic

The calculations apply to vaccine sub-series regardless of the toxicity interval of the series, i.e., a given sub-series e.g., EJ contains all quantities from maximum toxicity to minimum toxicity added together

SERIES - is a sequence of the first 6 characteristic characters derived from the vaccine lot number

All series numbers are **9228**

SUB-SERIES - is a sequence of the first 2 characteristic characters from the vaccine lot number

All subseries numbers i.e. ER , EN etc. Are **733**

The first 12 SUB-SERIES

EJ EK EL EN EP ER EW FA FC FDFE FF											
12 (1.64%) SUBSERIES have 3565 (38.63%) SERIES in them - which account for 82.85% of ADRs and 74.83% of all Deaths , 78.20% of all Disabilities and lastly 76.10% of all Life Threatening Diseases											
12	1,64%	3565	38,63%	270 290	82,85%	5 891	74,83%	11 338	78,20%	6 997	76,10%

Podsumowanie

The 123 (1.33%) most toxic series with different numbering account for 63.08% of all ADRs

665 (7.21%) moderately toxic series of different numbering account for 32.28% - ADR

8440 (91.45%) low toxicity series of different numbering account for 4.62% - ADR

You can also say that : after adding up the Mega High and Medium toxic series

788 (8.54%) series with different numbering account for 95.36% of ADR

8440 (91.45%) of the differently numbered series account for 4.62% of ADR

DETAILED ANALYSIS OF THE - PFIZER - VACCINE SERIES BASED ON VAERS DATA

Sub-series - sorted and shown in PROCENTS % No. 1 of 2.

TOTAL U.S. and Non-U.S.

<https://www.howbad.info/pfizer.html>

Based on data from VAERS database - USA

According to data reported in VAERS, reproduced here, adverse events caused by Pfizer batches varied widely.

12 initial lots out of 733 that is 3.14% (e.g. EW , EL etc.) seems to elicit 95% adverse reactions.

PFIZER

Some lots of Pfizer products are associated with more deaths and disabilities than other lots.

Extracted start from the names in the series and summed	in numbers		733	9 228	326 222	7 873	14 449	9 494

DETAILED ANALYSIS OF THE - PFIZER - VACCINE SERIES BASED ON VAERS DATA

Sorted by FTS toxicity factor of series No. 1 of 2.

**TOTAL U.S.
and Non-U.S.**

after adding up
repeated series

Extracted EK,ER
etc. sub-series
numbers from
series names

S1	Mega Mega	Toxic	above	3000		
S2	Mega	Toxic	between	2000	a	3000
S3	Highly	Toxic	between	1000	a	2000
S4	Medium	Toxic	between	100	a	1000
S5	Below Average	Toxic	between	10	a	100
S6	Low	Toxic	between	2	a	10
S7	Minimally	Toxic	flat	1		

FTS - Toxicity factor of a 4-column series using the formula

$$(((\text{ADR} * 0,1) * (\text{DEATHS} * 0,5) * (\text{DISABILITY} * 0,25) * (\text{LIFE THREATENING} * 0,15))) / 10000$$

According to data reported in VAERS, reproduced here, adverse events caused by Pfizer batches varied widely.

12 initial lots out of 733 that is 3.14% (e.g. EW , EL etc.) seems to elicit 95% adverse reactions.

Some lots of Pfizer products have been linked to more deaths and disabilities than other lots.

FTS - Toxicity factor of a 4-column series using the formula

$$(((\text{ADR} * 0,1) * (\text{DEATHS} * 0,5) * (\text{DISABILITY} * 0,25) * (\text{LIFE THREATENING} * 0,15))) / 10000$$

According to data reported in VAERS, reproduced here, adverse events caused by Pfizer batches varied widely.

12 initial lots out of 733 that is 3.14% (e.g. EW , EL etc.) seems to elicit 95% adverse reactions.

Some lots of Pfizer products have been linked to more deaths and disabilities than other lots.

DETAILED ANALYSIS OF THE - PFIZER - VACCINE SERIES BASED ON VAERS DATA

Sub-series sorted by DISABILITY No. 1 of 2.

**TOTAL U.S.
and Non-U.S.**

after adding up
repeated series

Extracted EK,ER
etc. sub-series
numbers from
series names

S1	Mega Mega	Toxic	above	3000		
S2	Mega	Toxic	between	2000	a	3000
S3	Highly	Toxic	between	1000	a	2000
S4	Medium	Toxic	between	100	a	1000
S5	Below Average	Toxic	between	10	a	100
S6	Low	Toxic	between	2	a	10
S7	Minimally	Toxic	flat	1		

FTS - Toxicity factor of a 4-column series using the formula

$$(((\text{ADR} * 0,1) * (\text{DEATHS} * 0,5) * (\text{DISABILITY} * 0,25) * (\text{LIFE THREATENING} * 0,15))) / 10000$$

According to data reported in VAERS, reproduced here, adverse events caused by Pfizer batches varied widely.

12 initial lots out of 733 that is 3.14% (e.g. EW , EL etc.) seems to elicit 95% adverse reactions.

Some lots of Pfizer products have been linked to more deaths and disabilities than other lots.

DETAILED ANALYSIS OF THE - PFIZER - VACCINE SERIES BASED ON VAERS DATA

Subseries sorted and shown in NUMBERS - Total No. 1 of 12.

TOTAL U.S. and Non-U.S.

<https://www.howbad.info/pfizer.html>

Based on data from VAERS database - USA

According to data reported in VAERS, reproduced here, adverse events caused by Pfizer batches varied widely.

12 initial lots out of 733 that is 3.14% (e.g. EW , EL etc.) seems to elicit 95% adverse reactions.

Some lots of Pfizer products are associated with more deaths and disabilities than other lots.

DETAILED ANALYSIS OF THE - PFIZER - VACCINE SERIES BASED ON VAERS DATA

Sub-series sorted and shown in PROCENTS of % - Total No. 1 of 12.

TOTAL U.S. and Non-U.S.

<https://www.howbad.info/pfizer.html>

Based on data from VAERS database - USA

According to data reported in VAERS, reproduced here, adverse events caused by Pfizer batches varied widely.

12 initial lots out of 733 that is 3.14% (e.g. EW , EL etc.) seems to elicit 95% adverse reactions.

PFIZER

Some lots of Pfizer products are associated with more deaths and disabilities than other lots.

DETAILED ANALYSIS OF THE - PFIZER - VACCINE SERIES BASED ON VAERS DATA

Sub-series sorted by ADRs - Total - 166 pages No. 1 of 166.

**TOTAL U.S.
and Non-U.S.**

after adding up
repeated series

Extracted EK,ER
etc. sub-series
numbers from
series names

S1	Mega Mega	Toxic	above	3000		
S2	Mega	Toxic	between	2000	a	3000
S3	Highly	Toxic	between	1000	a	2000
S4	Medium	Toxic	between	100	a	1000
S5	Below Average	Toxic	between	10	a	100
S6	Low	Toxic	between	2	a	10
S7	Minimally	Toxic	flat	1		

FTS - Toxicity factor of a 4-column series using the formula

$$(((\text{ADR} * 0,1) * (\text{DEATHS} * 0,5) * (\text{DISABILITY} * 0,25) * (\text{LIFE THREATENING} * 0,15))) / 10000$$

According to data reported in VAERS, reproduced here, adverse events caused by Pfizer batches varied widely.

12 initial lots out of 733 that is 3.14% (e.g. EW , EL etc.) seems to elicit 95% adverse reactions.

Some lots of Pfizer products have been linked to more deaths and disabilities than other lots.

DETAILED ANALYSIS OF THE - PFIZER - VACCINE SERIES BASED ON VAERS DATA

ORIGINAL SERIES NAME BEFORE SUMMARY - 215 pages No. 1 of 215.

Results-total

TOTAL U.S. and Non-U.S.

before adding up the series

According to data reported in VAERS, reproduced here, adverse events caused by Pfizer batches varied widely.

12 initial lots out of 733 that is 3.14% (e.g. EW , EL etc.) seems to elicit 95% adverse reactions.

Some lots of Pfizer products are associated with more deaths and disabilities than other lots.
