

V-SAFE Reports with Symptom Keyword = FATIGUE

compiled by Craig Paardekooper

V-Safe is the largest collection of vaccine testimonies on the planet.

One of the reasons why the CDC was so reluctant to release the free-text entries of the V-Safe reports is because these entries are the personal testimonies of vaccine effects – numbering 390,000 per release, and numbering millions in total.

Having censored and erased hundreds of thousands of testimonies of vaccine injury from Facebook, the government was equally reluctant to be the provider of what is the largest collection of vaccine testimonies on the planet – collected by the CDC themselves !

Perhaps this is <<the longest story ever told>>, the testimony of 1 million people.

Many thanks to ICAN (<https://icandecide.org/v-safe-data/>) who pursued the CDC through the courts until they finally conceded and began to release this data on January 15th 2024.

Data is from all 4 releases, up until June 15th 2024, reported by 1,092,715 Covid <<vaccine>> recipients. The next release is on July 15th, 2024.

Data

Data Source : V-SAFE (CDC) : download (June 2024) @ <https://icandecide.org/v-safe-data/>

Total number of V-Safe reports with symptom keyword FATIGUE = 28240

Percentage of V-Safe reports with symptom keyword FATIGUE = 1.55165 %

(V-Safe) Total number of Covid <<vaccine>> recipients with this symptom = 26922

(V-Safe) Percentage of Covid <<vaccine>> recipients with this symptom = 2.46377 %

Limitations

This report shows the incidence of a symptom amongst a <<vaccinated>> population of 1092715 in the V-SAFE database. The onset of a high incidence after <<vaccination>> suggests possible cause - requiring further investigation of - 1) Other databases, such as VAERS and EUDRA, 2) Clinical literature and scientific papers.

I came down with a nasty viral illness in the beginning of July. I was tested once for covid and it came back negative. I had severe fatigue after I got over the acute illness, and some other lingering symptoms. In October, an ENT dr. Told me he was sure I caught covid and was having a post viral syndrome. One of the long term symptoms has been weird trigeminal tingling on the right side of my face for months. That started to drastically reduce a few hours after my first dose of the vaccine and has almost gone away since then.

Fatigue at the 24 hour mark, resolved day 2

fatigue : Case 1273: ID 5UB-18214-64605

I want to report that I got my vaccine on Wednesday, December 23. What I'm not about to capture here because I didn't sign up for this until multiple days after vaccine is that fit 36 hours post vaccine, my deltoid muscle was hot and the skin was red. I could barely lift my arm and pain was 7/10. I had severe fatigue, chills, headache, I felt febrile although the wasn't running a fever, and I felt flu-like with all over achiness. The peak of this was about 16-28 hours post vaccine. Within 36 hours I felt back to normal with just mild tenderness at injection site.

Dreary weather can fatigue me

fatigue : Case 1375: ID S7V-12605-20960

On December 23rd I started feeling weak in the evening. The next day, I had diarrhea, was coughing, a headache intermittently and the fatigue returned. I quarantined Christmas Eve and at 10:30 Christmas morning was tested for the coronavirus at the hospital. One thing I forgot to mention was Thursday afternoon I made some popcorn but burned it a little. I didn't notice not smelling the burnt smell but I did notice that the popcorn didn't have much flavor. In the middle of that night I woke up and smelled smoke and after checking to make sure my house wasn't burning down, it occurred to me that I hadn't smelled the smoke earlier. Which added to the list of symptoms.

fatigue : Case 1404: ID Q8D-17292-75068

Not really the fatigued part but the tiredness. I've been falling asleep about 2 hrs earlier than normal. It doesn't affect my schedule though.

fatigue : Case 1405: ID 3DE-13573-41226

I've had some neck and shoulder pain, but honestly I had that before the vaccine. I also had some fatigue over the weekend, but attribute that to the Christmas rush, I just felt it was important to share. In yesterday's update I said I as feeling good, but honestly had these same symptoms, but not attributing it to the vaccine.

fatigue : Case 1406: ID KQ3-14050-95689

I experienced fatigue on the day I took the vaccine as though energy was sucked out of my body. I felt warmth in my left arm where I took my vaccine. It subsided in 1 day. A couple of days later I experienced some muscle pain especially in my back muscles. No fever or sore throat or other respiratory symptoms. Sometime ago, maybe 2 months ago I had similar symptoms with fever, got tested for COVID-19 but it was negative. At present, I am fine. I wanted to nevertheless let you all know. Thanks for checking on me.

fatigue : Case 2068: ID KMS-28186-95208

I got the pfizer covid vaccine. I had been dealing with some of the adverse reactions to the vaccine. They are the typical reaction, but reaction nonetheless. It started 24 hours after I received the vaccine. I started to get body aches with some dizziness while working Monday. I expressed my concern with a coworker that I was worried it was from the vaccine. By Monday night I had severe aches and pains with chills so bad my whole bed was shaking and my husband couldn't sleep in it with me. Tuesday morning I awoke with a fever of 101.4Â°, taking 800 mg Motrin I was only able to get it down to 101.0Â°. The body aches

continued all day with fatigue. Yesterday, I started out having the body aches, but they actually went away in the afternoon. About 48 hours of discomfort. I know these are typical reactions, but they sucked nonetheless. All of the residents in the facility I work at and 50 some odd employees received the vaccine, and I appear to be the only one that has issues. My luck!! Oh and I had COVID the end of October.

fatigue : Case 2069: ID QYZ-31156-92161

I received my vaccine on Monday. Tuesday evening I was very fatigued. I thought it was due to an early morning and a long day of work. It was the most fatigued I've ever been. In retrospect, I think it was likely due to the vaccine. It was just for one night, and better on Wednesday morning.

I lost the use of my right arm & couldn't lift it. I've had Covid twice & the night I had made me long for Covid. I'm not sure I can go thru this again for a 2nd shot. I want to do my part

but this was unreal. Anyone around me actually said don't get the 2nd shot. It felt like death had entered my bones as if they were being hammered. I kept waking up crying with a respiration rate in the 60s. I couldn't take deep breaths because my ribs were hurting. I have a very high pain tolerance & this had me in tears. That all started 12 hrs after injection. At about 23 hrs after injection I went to more flu like fatigue & body aches & not bone crushing pain. I felt flushed & hot last night but my temp was 36.6. I took a meloxicam & mapap last night at 9p & again today at 8a. I've slept most of today as I can't do anything else. I also had parasthesia

fatigue : Case 2186: ID 6XB-23402-17174

Triggered hemiplegic migraine which included paresthesia down right arm and mouth and tongue tingliness. No difficulty breathing but did take Benadryl and Tylenol to be on the safe side. Also had dizziness. These symptoms were approximately 20 minutes after getting the vaccine. 30' minutes after taking Benadryl and Tylenol, the dizziness and mouth/tongue tingling subsided. Then extreme fatigue but could be due to the Benadryl. Next day I was also very tired despite rest.

fatigue : Case 2467: ID Y3T-14746-28671

Severe fatigue and activity intolerance yesterday as well

fatigue : Case 2468: ID MJ4-14274-58652

The pain at the injection site lasted 48hrs. On reflection I did feel fatigued the day of the first injection and napped for 2 hrs, not a common practice for me. I also had a mild headache that night 3/10 pain score, but it was noticeable because I rarely get headaches. I have no symptoms this morning

fatigue : Case 2469: ID BVY-17233-47564

Fatigue is a bit better than it's been. I also did not mention that the pain in my arm where I received the injection had gone to my lower arm. I don't know if that had to do with the shot or not. It was the same kind of pain-sharp-but it feels better than it did before. I almost was going to call the physician on call for New Year's but then she thought maybe it's just working itself down my arm. Pain in arm was severe and fatigue was mild today. Pain was mild today after being severe before

fatigue : Case 2531: ID XN7-19595-25433

Injection arm (right) feels easily fatigued

fatigue : Case 2532: ID 9A3-33286-25578

Unfortunately, I did not do this right away, as I was fine the first 8 hours then occupied with my moth-in-law having strokes. Latter in the evening, after my side effects started that night, I was too sick to think clearly enough to complete this. I ran a fever for 24 hours over 100 at highest Jan 1st. Vomited several times, severe muscle and joint pain and headache, fatigue. By yesterday the fever was gone, pain was minimal, but some nausea. Today, 1/3, still nauseated and eating only bland foods. Still fatigued but nothing like the first 48 hours. I figured today I'd submit this, hoping to maybe help with data collection. I DO intend to try and speak with a Moderna rep tomorrow. I'm very concerned that my reactions were worse due to having had covid 12/13/20. I'm quite concerned about getting the next vaccine, and wondering how long I could postpone #2 and have it be effective.

fatigue : Case 2849: ID KL6-74926-66494

These symptoms all occurred overnight between 3:30-7:00am, tapering back to Moderate Fatigue and mild Pain/body aches and mild nausea through the day. Also, on the opposite arm at roughly the same place as the injection site. That was strange.

fatigue : Case 2850: ID YMB-18447-29207

Last night I felt fatigued, chills, muscle aches, some fever. This morning I feel much better

fatigue : Case 2851: ID 9HT-15185-88131

Today is actually day 2 after the vaccine. Yesterday was really bad. I felt like I did when I actually had Covid in April. Fever, chills, achy, headache, fatigue. Today has been much better. I would say yesterday the symptoms was severe.

fatigue : Case 2852: ID MD4-23494-49841

After my first dose, I had chills/fever, fatigue, bodyaches, & headache similar to the flu.

fatigue : Case 2853: ID MKV-21066-79944

no symptoms today, but yesterday (day after 2nd dose) I had chills, headache, joint pain, and fatigue

fatigue : Case 2854: ID TKQ-12777-15989

Dizziness, fatigue

fatigue : Case 2855: ID UYG-18231-46328

Fatigue

fatigue : Case 2856: ID 577-18184-17231

Scheduled chiropractor

Extreme left shoulder and trapezius pain with fatigue and chills last night. I took Advil and felt not as stiff in my neck today

fatigue : Case 2857: ID PKK-33971-13817

Fatigue on first night, within several hours-no fatigue today.

fatigue : Case 2858: ID Y6S-17678-11287

Chills, muscle aches, fatigue on day 1-2 of administration. Didn't fill out survey those days

fatigue : Case 2859: ID BFH-12429-73060

The ulcer in my mouth has become more like a boil, still on the inside of my lower left lip. Also I have needed to nap on each of the days since the injection. So I should have been reporting fatigue each day thru today. MILD

fatigue : Case 2860: ID 63T-29710-64970

Fatigue.

fatigue : Case 2861: ID AQP-10529-19022

Fatigue not related to vaccine.

fatigue : Case 2862: ID UBS-17101-02466

1/5/2021 - No headache - still with numbness/tingling/sensation of cold burn at center of both lips and tip of tongue No pain at injection site - Still fatigued but forcing myself to do things

fatigue : Case 2863: ID Y6B-25136-15724

I had fatigue and feverish on day 1 post vaccine

fatigue : Case 2864: ID NYP-13438-77808

Hour 6-24 post injection was when the arm pain occurred. Hours 12-24 post injection, I experienced a mild headache and mild fatigue. The arm pain I experienced made it difficult for certain daily activities as I was unable to lift my arm past shoulder height.

fatigue : Case 2865: ID D2D-31005-46727

I am feeling better today, but I have had many reactions since receiving the Moderna vaccine. I have had an itchy, red, bumpy rash on either side of my stomach since I was very sick w/ covid19 in March. The rash disappeared w/in 2 days of receiving the vaccine. The first night after receiving the vaccine, I woke up @ 4am w/ extreme throbbing pain in my arm. Felt like my arm was broken. My arm was so sore for around 3 days, I took ibuprofen. For 3-4 days after vaccine I had on/off fever, sweating, headache, diarrhea, nausea, extreme fatigue, back pain relief and ear soreness. It was like the vaccine was going through my system and relieving all the ailments I've had since March. I know it's not intended to be therapeutic, but for the first time since March I have energy and feel like I did before I had covid19. Perhaps I am a long hauler. But I am so grateful for the vaccine and it getting covid19 out of my body !

fatigue : Case 2866: ID 4BF-24288-60290

Fatigue even after resting and eating well

fatigue : Case 2867: ID JRH-45221-04196

fatigue : Case 2884: ID ZFW-15866-61831

I was actually very fatigued yesterday. I did not report it on my survey. But did not inhibit my daily activities.

fatigue : Case 2885: ID TG4-18841-91423

I was up late last night and only had about 4 hours sleep, and I think this is the cause of my fatigue, not the vaccine I received this morning

fatigue : Case 2886: ID 6TK-86161-44419

Just felt fatigued, headaches and irritable. May not be related to the vaccine but I feel notably cruddy today.

fatigue : Case 2887: ID 28J-23256-96190

Starting the day after the vaccination I had approximately 3 days of relatively significant headaches, 100i³/₄ fever, and fatigue. Fatty injection on December 29th and all of my symptoms subsided by Saturday evening January 2nd

fatigue : Case 2888: ID SYA-21678-30383

Last night was fatigued when I went to bed but nothing since then!

fatigue : Case 2889: ID WWL-30558-69823

None from today but I did have symptoms in the 1-3 days after injection. This included fatigue nausea and body aches. All mild to moderate and have gone away.

fatigue : Case 2890: ID XXB-13079-27928

Muscle and body aches could be SLE, but the fatigue was def from the injection

fatigue : Case 2891: ID CF6-21521-04932

Slight soreness in shot location Very slight fatigue (may be do to sleep)

fatigue : Case 2892: ID LVE-49575-59787

fatigue : Case 2911: ID L76-28117-22594

Re: the above, I'm five days postpartum which is causing the fatigue!

fatigue : Case 2912: ID AV2-11875-30177

1 day after injection felt tired, fatigued and slept most of the day; Day 2-7 after injection felt mild tired, mild fatigued, mild general malaise, left arm mild to moderate pain, but ignored; Day 8-11 after injection left arm injection site mod pain, mod swelling, mod itching, no

infection, no fever, general fatigue much improved; Day 12 after injection Left arm in site improving, becoming less itchy, less swollen, less painful, general fatigue gone. Day 13 today- see info completed under symptoms check.

fatigue : Case 2913: ID AP5-11153-80101

Limp nodes under arm in same arm vaccine was given are swollen. I have been very fatigued today more than normal

fatigue : Case 2914: ID XB5-32444-22149

No, and honestly, the fatigue could be work related and nothing to do with vaccine.

fatigue : Case 2915: ID 6GK-28819-54761

Good this AM. After lunch-sudden onset abd pain diarrhea nausea. Took nap. Fatigue past that

fatigue : Case 2916: ID R53-77931-76000

All over body fatigue for three days following the vaccine
