

V-SAFE Reports with Symptom Keyword = HEADACHE

compiled by Craig Paardekooper

V-Safe is the largest collection of vaccine testimonies on the planet.

One of the reasons why the CDC was so reluctant to release the free-text entries of the V-Safe reports is because these entries are the personal testimonies of vaccine effects – numbering 390,000 per release, and numbering millions in total.

Having censored and erased hundreds of thousands of testimonies of vaccine injury from Facebook, the government was equally reluctant to be the provider of what is the largest collection of vaccine testimonies on the planet – collected by the CDC themselves !

Perhaps this is <<the longest story ever told>>, the testimony of 1 million people.

Many thanks to ICAN (<https://icandecide.org/v-safe-data/>) who pursued the CDC through the courts until they finally conceded and began to release this data on January 15th 2024.

Data is from all 4 releases, up until June 15th 2024, reported by 1,092,715 Covid <<vaccine>> recipients. The next release is on July 15th, 2024.

General feeling of being unwell. My head feels very heavy though not a headache. I suffer from headache all the time and this is different.

headache : Case 368: ID PKU-86651-26606

I think the headache was sinus related, not due to the vaccine

headache : Case 369: ID MPG-31476-86860

Very mild headache

headache : Case 370: ID GXE-59045-99970

Bad headache last night

2hrs ago my arm began to swell followed by headache

headache : Case 427: ID RPQ-29341-98746

Headache might be more dehydration than from the vaccine

headache : Case 428: ID AN2-16256-82046

I work in the hospital and got my vaccine there

I'm in the ED right now for left sided muscle aches and headache

headache : Case 429: ID ZDZ-13863-05066

I had a slight headache this morning but it's no different than any other day after I work. I worked 2 days wearing an N95 for 12 hours, 2 code blues (hot as hades in there) and a code stroke plus regular shift stuff, then came home and knocked back half a bottle of Cab Franc, so the mild headache I had this morning I in no way attribute to the vaccine, it was honestly less than I usually wake up with after work

headache : Case 430: ID 2H6-32886-23585

Last night I had another pounding headache and mild fatigue. No headache now but I'm feeling a shift in my energy and mood. Otherwise- no more pain at the injection site.

headache : Case 431: ID DZL-28384-83729

Maybe a slight headache an hour after than lasted an hour or so

headache : Case 543: ID 3EP-64952-55139

But i dont know the headache is from the vaccine. I havent hydrated well today. Its mild also

headache : Case 544: ID UW2-33631-25693

Headache reported yesterday as mild actually became quite severe by the end of the evening with photophobia

headache : Case 545: ID BDC-16594-37567

I had muscle aches, headache and chills no fever last night for about 12 hours, controlled with Motrin. Totally gone today

headache : Case 546: ID 964-12705-02741

I felt a headache for a split second this morning and it went away immediately. I felt tired later last night (after my initial check-in) during work. I also did not sleep that much the night before so it could be just because of lack of sleep the night before. I went to the

bathroom twice last night (defecate) and I normally don't go that often. I had a change in diet the day prior so I believe it was due to the diet change (mexican food).

headache : Case 547: ID 4AN-16964-34244

When i first received the shot, i had a slight headache. I get them quite often but this did feel a bit different. Like it was more in my neck than head.

I have heard people are having more allergic reactions. After speaking with the doctor and nurses I was advised to go ahead with the vaccine. I have allergies to bees and aspirin and penicillin and swell and can't breathe. I was told the reactions were only to if you have had a reaction to other vaccines. I did not have any issues in this regard. Since the shot I have had headaches and very tired but didn't mention them because I have other medical issues that could have caused that. Also was very cold as well. Wondering how the next vaccine will go since it is a larger dose.

On December 23rd I started feeling weak in the evening. The next day, I had diarrhea, was coughing, a headache intermittently and the fatigue returned. I quarantined Christmas Eve and at 10:30 Christmas morning was tested for the coronavirus at the hospital. One thing I forgot to mention was Thursday afternoon I made some popcorn but burned it a little. I didn't notice not smelling the burnt smell but I did notice that the popcorn didn't have much flavor. In the middle of that night I woke up and smelled smoke and after checking to make sure my house wasn't burning down, it occurred to me that I hadn't smelled the smoke earlier. Which added to the list of symptoms.
