

V-SAFE Reports with Symptom Keyword = JOINT PAIN

compiled by Craig Paardekooper

V-Safe is the largest collection of vaccine testimonies on the planet.

One of the reasons why the CDC was so reluctant to release the free-text entries of the V-Safe reports is because these entries are the personal testimonies of vaccine effects – numbering 390,000 per release, and numbering millions in total.

Having censored and erased hundreds of thousands of testimonies of vaccine injury from Facebook, the government was equally reluctant to be the provider of what is the largest collection of vaccine testimonies on the planet – collected by the CDC themselves !

Perhaps this is <<the longest story ever told>>, the testimony of 1 million people.

Many thanks to ICAN (<https://icandecide.org/v-safe-data/>) who pursued the CDC through the courts until they finally conceded and began to release this data on January 15th 2024.

Data is from all 4 releases, up until June 15th 2024, reported by 1,092,715 Covid <<vaccine>> recipients. The next release is on July 15th, 2024.

joint pain : Case 872: ID 9A3-33286-25578

Unfortunately, I did not do this right away, as I was fine the first 8 hours then occupied with my moth-in-law having strokes. Latter in the evening, after my side effects started that night, I was too sick to think clearly enough to complete this. I ran a fever for 24 hours over 100 at highest Jan 1st. Vomited several times, severe muscle and joint pain and headache, fatigue. By yesterday the fever was gone, pain was minimal, but some nausea. Today, 1/3, still nauseated and eating only bland foods. Still fatigued but nothing like the first 48 hours. I figured today I'd submit this, hoping to maybe help with data collection. I DO intend to try and speak with a Moderna rep tomorrow. I'm very concerned that my reactions were worse due to having had covid 12/13/20. I'm quite concerned about getting the next vaccine, and wondering how long I could postpone #2 and have it be effective.

joint pain : Case 1213: ID 7RJ-20456-75156

Immediately after when I was sitting down I felt extremely nauseous and began sweating profusely. I stayed probably ten minutes a little extra because I wasn't feeling well and didn't think I could drive. Once I started driving my neck and back muscles started tightening and hurting horribly. Then I got this feeling on the side of my injection side (left side) that felt like when you get an iodine contrast dye put into you...it was a cool numbing rush all over and then started going all over and I freaked out cause I was on the highway. I was eventually able to pull over and relax and get home. I then started feeling like âjelloâ and and headaches etc. If I laid down they would settle down but any time I tried to move they would flare up. Joint pain was 2 days afterwards.

It's been 4 days since I received my 2nd dose and this is the first time vsafe has checked in with me. So let's catch up on some data: Starting at the 13 hour mark for about 20 hours I had moderate injection site soreness, elevated temperature, moderate joint pain/aches throughout, and severe chills and fatigue. As this was subsiding I started to develop intense unilateral axillary lymph node pain (on side of injection site) and mild intermittent headaches. Today my axillary lymph nodes are mildly sore, and mild headaches emerge intermittently.

joint pain : Case 1760: ID 7LB-23265-01257

Did have mild joint pain in shoulder where 2nd shot was given, but it resolved after a few hours. Reason i checked it is because form won't let me ask a question unless I checked something.I have question about 2nd immunization. Since my symptoms were much milder after 2nd shot than 1st, i am wondering if that means it wasn't given correctly and therefore is not protecting me as well as it should. Any opinion on that? Thx..

joint pain : Case 1835: ID Z9G-14462-33699

I suffer from Fibromyalgia so it's often hard to tell what is causing my pain, but just in case it is related to the vaccine I would like to report that about 7 days post vaccine I began to experience body aches and fatigue that has gotten progressively worse. I'm achy all over and I'm having trouble moving due to the pain. Joint pain in knees, ankles, hips and hands and body feels like it's throbbing. I've also had run going in one ear that began the day after I received the vaccine. Again, not sure if any of this is related but wanted to report for trend analysis.

joint pain : Case 2416: ID 4UK-19579-00581

The only symptoms I experienced were 22-32 hours post- vaccine#2 (which I reported already in a typed answer, last week). On 1/6/21 I received Pfizer Biontech Covid-19 Vaccine #2 Dose. 1/6/21 rest of the day had sore arm (muscle soreness at injection site only) for rest of day. On 1/7/21, about 22 hours post-vaccine, I experienced moderate to severe muscle aches/joint pain at lower back (worst), hips (2nd worst), knees (3rd worst) & ankles (4th worst); I also experienced chills concurrently with joint pain/muscles aches. These symptoms, starting 1/7/21, lasted for @ 10 hours & had subsided by midnight on 1/7/21. Ibuprofen really helped the symptoms, which were gone by 1/8/21. In all, I was symptomatic from the 22nd through the 32nd hour post-vaccine #2, then ok. No history of any allergies to foods or meds, no previously notable vaccine reactions or adverse effects to other vaccines in past.

Both right and left lower extremities joint pain

joint pain : Case 2808: ID L8J-20343-93940

I have EDS, so the joint pain is normal and very likely not due to the vaccine. I also have dysautonomia, so the fatigue is very common. Gastroparesis means I have nausea most days, so that does not seem to be an outlier. Because I have symptoms so frequently without the vaccine, it is hard to say if they can be attributed to the vaccine. I am reporting them just for honesty.

joint pain : Case 2809: ID ZPF-33931-84165

First two days after 2nd dose had mild fever, chills, joint pain

joint pain : Case 2810: ID L7A-30105-32365

Reg dr visit for arthritis before vaccine

Joint pain is result of arthritis that i am being treated for & began before vaccine.

joint pain : Case 2816: ID BJL-11517-64525

Just some joint pain where my knee bends, but I dont believe it has anything to do with the vaccine and is feeling better.

joint pain : Case 2817: ID AQT-29574-31497

Joint pain is from arthritis, not the vaccine.

joint pain : Case 2818: ID A3A-38007-02000

I think the injection was too high (near the level of my acromion). I have shoulder joint pain in the ipsilatera shoulder but not at the injection site. Im concerned the vaccine was injected into my joint. I was unable to move my arm due to anterior shoulder pain for a few days after the injection. The pain had improved but is still there. I also have intermittent tingling of my ipsilateral upper extremity.

joint pain : Case 2819: ID MB3-17334-47066

I had a fever varying from 100-102.6 starting approximately 1.5 days after injection lasting about 2.5 days. I had muscle and joint pain from my neck into my elbows, down my back and hips into my knees for 2 days starting the evening after my injection. I also had swollen lymph nodes starting 1.5 days after injection and this has continued, but seems to be less.

joint pain : Case 2820: ID S6Y-27523-33099

My left fourth toe still has a little bit of pins and needles in it like I had when I had Covid last March. The next day my right fourth toe started getting the same nerve type pin/needle pain. I had both of these with Covid last March interestingly. I have long haulers so I have had joint pain and bodyaches since March which I started taking Celebrex for in October. I went off of all of my inflammatories when I got this Immunization last week so I am achy and sore everywhere but that's probably why. I have been taking Tylenol only which doesn't work as well as Celebrex!

joint pain : Case 2963: ID 3E8-25758-11698

The joint pain I experienced starting 12 hours after the second shot was unbearable! I had chills complete and total fatigue and nausea. The pain in the arm where the injection was given was so painful I could not move my arm . Extremely poor sleep due to symptoms. Today, 7 days later, fatigue, headache and joint pain is much improved but still present. Though the joint pain has been the worst to deal with, I am so thankful to have received both doses! Thank you!
