FREIGHT

Freight must be charged on any building with a subtotal of \$40,000 or greater. Also, any building wider than 40ft will need freight. Freight is \$4 per mile per every \$40,000. Example: Subtotal \$60,000. $\$60,000 / \$40,000 = 1.5 \times \$4$ Per mile = \$6 per mile x Mileage from 27030 to customers address.

Equipment Rental

Any Buildings taller than 14ft or wider than 30ft will need a 7k Telescopic Lull Lift. We can provide this for \$2,000 weekly or the customer may provide their own, but we will need a copy of the invoice at time of scheduling showing the proper lift was rented. All Buildings 17ft - 20ft tall will require an additional lift for an additional \$2,000 weekly. Also, if the customer provides their own lift we are not responsible for any additional charges due to delays on scheduling. Customers installing on a wall may be subject to providing a lift depending on the height of their structure.
