

Student Activities Funding Application

CMS Student Committee (Studc)

The Canadian Mathematical Society Student Committee accepts applications for financial support for student activities. These events are usually, but not always, concurrent with a local conference or another mathematical event.

Please send a complete application in .pdf format to chair-studc@cms.math.ca. The subject line should include "Application for Student Activities Support". A complete application will comprise of 1-2 pages, maximum, and will include the following information:

- Date and title of the event;
- Purpose/description of the event;
- Number of expected (student) participants;
- How the event will benefit the local/greater mathematical (student) community;
- A detailed budget (including other sources of funding, confirmed or otherwise);
- Contact information.

A strong application will precisely indicate for what use CMS Studc funds will be allocated. The merit of the application will be considered relative to the funding support requested. Applications will be judged on the event's relevance to university students and its impact on the mathematical community.

The successful applicant will be asked to acknowledge the CMS Studc and to display the Studc logo in the conference package (where applicable). We also ask for a group photograph and a brief note (100 words) about the event to be considered for publication in our semi-annual newsletter [Notes from the Margin](#).

In the following table, we give guidelines on the maximum support normally given to various events:

<u>Type of Event</u>	<u>Support</u>
Local seminar	\$125
Support for an event concurrent with a local conference	\$250
General conference support*	\$500

*Since funding is limited, only few requests for general support can be granted in a given year.

Applications are considered on an ongoing basis.
