

## Government-grade camera series

### Overview

Verkada's government-grade cameras include FIPS 140-validated encryption and are TAA and FY2019 NDAA compliant—essential compliance criteria for government-grade deployments. These models are ideal for use with Command for GovCloud, Verkada's FedRAMP<sup>1</sup> Moderate Authorized environment. These devices offer durable, vandal-resistant designs, advanced computer vision features, and require no additional setup, downloads or configuration.

Powerful onboard Ambarella processors enable Verkada's advanced people and vehicle analytics. Organizations can quickly search based on a variety of attributes like clothing color, gender appearance, and facial matches, as well as vehicle type, color, make, and model. Verkada's [AI-powered search](#) can also be used to search for specific footage and create alerts based on freeform text prompts. Government-grade bullet cameras also offer license plate recognition capabilities.

Government-grade cameras are compatible with the standard Verkada Command platform, as well as Command hosted in AWS GovCloud (exclusively available to US government organizations<sup>1</sup>). With Verkada's robust offering of government-grade cameras, organizations can benefit from a wide breadth of camera models and form factors designed for a variety of government environments.

### Key features

#### Government-grade security

- Meets the FIPS 140 standard, as validated by NIST
- FedRAMP Moderate Authorized
- TAA and FY2019 NDAA compliant

#### Enterprise-grade performance

- High-resolution progressive CMOS image sensors with up to 4K resolution
- Dedicated system-on-a-chip for an enhanced streaming experience
- Advanced edge processing for motion, people, vehicle, and AI analytics

#### Hybrid cloud architecture

- Onboard storage and processing for reduced bandwidth consumption and coverage at scale
- 30 - 365 days (256GB - 3TB) of onboard storage
- Redundant cloud backup and unlimited cloud-based archiving of footage

1. Federal, state, local, or tribal organizations, research institutions, federal contractors, and government contractors.

## Verkada hybrid cloud benefits overview

### No NVR or DVRs

Enterprise-grade onboard storage saves up to 365 days of continuous video<sup>1</sup>

### Easy to scale

Bandwidth friendly and supports thousands of globally-distributed sites

### Centralized management

Modern platform enables secure remote access on any supported browser or device

## The reliability of onboard storage, with the accessibility and scalability of the cloud

### Lightweight, hassle-free installation

- No NVRs, DVRs, or servers—just a PoE connection
- Cameras come online and configure in minutes without 3rd party plugins, thick clients, or downloads
- No additional software or complexities like port forwarding

### Easy to use

- Intuitive UI for streamlined investigations and quick incident resolution
- Provision user accounts to access footage and features without additional training
- Find, download, and share footage from any supported browser or device

### Predictable total cost of ownership

- Hardware includes a 10-year warranty<sup>2</sup>
- New software features are pushed over-the-air, without any additional cost

### Scalable across sites

- Onboard storage and processing for reduced bandwidth consumption
- Cloud-based management platform centralizes globally-distributed devices
- Automatic firmware updates keep systems secure, eliminating the need for ongoing maintenance

1. All our cameras record in "adaptive quality," capturing both standard and high quality streams. Standard quality (SQ) video is stored up to the amount of retention specified by the customer. The amount of high quality video stored on the camera will depend on the amount of motion detected by the camera over time. To learn more, visit our website:

<https://docs.verkada.com/docs/adaptive-quality-recording-whitepaper.pdf>

2. Select products come with a 5-year warranty.

## Verkada Command: centralized, cloud-based management for distributed deployments

Command, Verkada's cloud-based management software, centralizes management of Verkada devices across globally-distributed sites. Within Command, users can provision new cameras, create and organize sites, manage device settings, access live and historical footage, manage users, and leverage advanced analytics.

### Manage from anywhere

- Remotely access footage and manage devices from any supported browser or device
- Leverage the Command mobile app for visibility on the go

### Quickly detect and respond to threats

- Stay informed with customizable, intelligent alerts
- Filter people using attribute search and create person of interest (POI) profiles for specific subjects
- Search and filter to find vehicles and license plates of interest

### Scale with simplicity

- Add more devices and sites without complicating the user experience
- Leverage granular roles and permissions to manage users at scale
- SAML-based integration with single sign-on (SSO) solutions

### Streamline incident management

- Accelerate investigations with intelligent people, face, and vehicle detection
- Consolidate relevant footage to easily review and share with internal and external stakeholders

### Keep data secure

- [Enterprise-controlled encryption](#) provides robust data protection, security, and control
- Stay secure with data encrypted in transit and at rest<sup>1</sup>
- Receive automatic firmware updates to stay a step ahead of emerging threats

### Archive and share over the cloud

- Command licenses include unlimited cloud archiving and 30-days of cloud backup
- Easily export any footage in MP4 format and allow recipients to verify its authenticity
- Share live links and historical footage with first responders

1. Data on device is encrypted at rest using AES-128. Data in the cloud is encrypted at rest using AES-256. Data in transit to the cloud is encrypted using TLS 1.2 or greater.

## Verkada's people and vehicle analytics

Simplify investigations with intelligent people, face, and vehicle detection

People and Vehicle Analytics combine intelligent edge-based video processing with computer vision to give users high-quality, cloud-based images of all individuals and vehicles identified across one's fleet. Using these analytics, security teams can filter for highly-detailed and specific attributes of people or vehicles.

## Bring intelligence to investigations

### Face search

- Quickly surface all appearances of a possible suspect by searching across all cameras for facial matches in a privacy-sensitive way<sup>1</sup>

### Person and License Plate of Interest notifications

- Create a Person of Interest using an uploaded photo or existing face in Command
- Set up proactive SMS, email, or mobile app notifications for when a matching Person of Interest is detected across one's cameras
- Use a freeform search bar to find matching license plates of interest. Further filter for potential license plate matches by U.S. state<sup>2</sup>
- Link License Plates of Interest to a Person of Interest to create a comprehensive profile of suspects in question

### Person and vehicle history

- Browse through high-resolution snapshots of people and vehicles detected
- Click into a snapshot of a suspect and use [history player search](#) to find all other instances of the individual in question throughout one's fleet

### Attribute filters

- Search for people and vehicles using a detailed list of prescribed attribute filters
- Use the vehicle search page to filter footage by vehicle color, type, virtually any make and model, and unique identifiers like noticeable body damage
- Use the people search page to filter footage by clothing color, gender appearance, and the presence of hard hats, safety vests, and other PPE – ideal for ensuring workplace safety

1. At Verkada, we intentionally do not train our People Analytics models to identify sensitive characteristics such as race, ethnicity, age, or other demographic information. We also set administrative guardrails around the use of People Analytics: it is disabled by default and after opting in, only users authorized by an Organization's admin may enable or view analytics on a given device.

2. License plate recognition is only supported on Verkada's bullet cameras.

## License plate recognition

Enhanced vehicle insights with Verkada's powerful LPR camera solution

Verkada's License Plate Recognition (LPR) solution allows organizations to monitor license plates in real-time and streamline vehicle investigations. The solution uses Verkada's edge-based processing and computer vision technology to capture license plate images and provide users with a readable and searchable list of license plate numbers. These captures are connected to live or recorded video for added context.

## Automatic license plate detection

### Track fast-moving vehicles and broaden coverage

Capture license plate characters at speeds of up to 80 mph / 128 kph, cover up to three lanes of traffic and identify international or U.S. state-specific license plates – all with high precision and low latency<sup>1</sup>

### Conduct exhaustive vehicle investigations

Use LPR to reconstruct a map of a vehicles' whereabouts and help security teams pinpoint vehicles of interest across expansive areas, like multiple city blocks

### Find license plates even with limited information

Verkada's LPR provides approximate license plate matches even if the inputted characters are incorrect or if the system is unable to detect all characters

### Receive custom License Plate of Interest Alerts

Send alerts via SMS, email, or mobile app to specific individuals or entire teams when designated license plates are detected across LPR-enabled cameras

1. For best results, install cameras as outlined in the [User Guide for License Plate Recognition](#).

1. All our cameras record in "adaptive quality," capturing both standard and high quality streams. Standard quality (SQ) video is stored up to the amount of retention specified by the customer. The amount of high quality video stored on the camera will depend on the amount of motion detected by the camera over time. To learn more, visit our website: <https://docs.verkada.com/docs/adaptive-quality-recording-whitepaper.pdf>
