CORE PROFESSIONAL PRACTICES FOR PROJECT DELIVERY

PROJECT MANAGEMENT

We train students to plan, organise, and supervise interior projects with precision. Students learn how to coordinate vendors, align client expectations, manage material logistics, and ensure site delivery matches the design intent. This prepares graduates to handle real-world design commissions from residential homes to commercial environments.

TENDER & CONTRACT

This module trains students to understand how interior projects are formalised through legal and commercial frameworks. Students learn how tenders are created, posted, evaluated, and awarded in real project environments. The course empowers them to read contractual terms, assess vendor qualifications, and make informed decisions that protect client expectations. This ensures that every project progresses with clarity, accountability, and professional integrity.

Apart from design, our students gain a wider range of career options and become experts in the field with in-depth professional knowledge.
