WHO WE ARE

TuDiveLog was born out of a love for the sea and the stories it holds. We handcraft eco-vegan leather dive journals for those who know that a dive doesn't end when you leave the water—it ends when you write it down.

Each piece is engraved with the name of its owner and the sea charm they chose. We're not a factory. We're a small, carefully crafted project with a soul.

FREEDIVING LOG

- Lung capacity and breathing technique
- Training notes and progression
- Water and wind conditions
- Safety buddy
- Sensations and mental state during the dive

What Makes It Different

Unlike the dive log, the freediving log records metrics specific to freediving: apnea times, duck-dive depth, breathing techniques, mental state, and physical sensations in the water.
