

BK11 & BK21

Alarm Keypad

CLASSIC ALARMS

V LINK

The multi-functional Alarm Keypad lets you arm/disarm with a key code, view live camera feeds and device status, and connect wireless intrusion sensors, no extra hardware needed. Organizations can also use existing alarm wiring to connect keypads to the BP41 Alarm Panel, saving time and money on installation.

Arm/disarm keypad

- Touchscreen keypad to arm and disarm a site
- A duress code can be entered to silently raise an alarm while disarming the system

View live camera feeds and device status

- Employees can view live camera feeds from around the property for added security and visibility
- See the status of every alarm device in the building to easily find if an active device is preventing the system from being armed

Panic button

- Easily accessible panic button for emergency situations

Connect via existing alarm wiring

- Choose whether to use RS485 to connect keypads to the BP41 Alarm Panel using existing alarm wiring, rather than installing new cables

Optional cellular backup

- Compatible with the ACC-CEL-LTE Cellular Backup Module in case of internet outage

Built-in wireless sensor hub (BK21 only)

- Integrated wireless hub can connect up to 60 wireless intrusion sensors or the BX21 wireless relay
- Up to 300 ft (90 m) line-of-sight range

BK11 Alarm Keypad BK21 Alarm Keypad + Wireless Hub
