 - Creative Studio: How to Load and Use Your Own CSS
 - Creative Studio: How to Preview a Page
 - Creative Studio: How to Style an Element
-

- **Product Integrations**

Product Integrations connect campusM to other systems, such as your discovery system or a weather service, and gets them into the hands of your users via Live Tiles in the App. In this course, we'll demonstrate how to configure and deploy Product Integrations.

- Integrating campusM with Your Other Systems
 - Events
 - Leganto Integration
 - Library Integration – Primo
 - Library Integration – Primo VE
 - List
 - Roles Integration
 - Introduction to Timetable
 - Timetable Configuration and Deployment
-

- **Attendance**

campusM Attendance allows student self check-in to class, and enables staff to keep track of attendance patterns. This course offers an introduction to Attendance and a tour of its configuration.

- Overview
 - Administration
-

- **AEK (Application Extension Kit)**

The Application Extension Kit (AEK) is a web-based framework where developers can create their own services, integrations and applications for publishing to the campusM app. AEK is designed for rapid, Just-In-Time (JIT), in-house development and deployment of new screens, in response to evolving user and institutional needs. This training provides an Introduction to the AEK Framework and how to create an AEK tile.

- AEK Overview
-

- **campusM Knowledge Acceleration Program**

Get the most out of campusM! This three-part program delves into topics that enable customers to activate critical functionality to drive product adoption.

- campusM Knowledge Acceleration Program - English
 - Programa de Aceleración del Conocimiento campusM - Español
