INTRODUCTION

Swap TC is a groundbreaking platform that rewards investors with a unique hyper-deflationary contract, increasing the value of their holdings and distributing BNB (BEP20) reflections without staking requirements. We are dedicated to developing safe and trusted utilities that cater to the needs of all crypto users, providing a seamless and productive experience on a single platform.

At Swap TC, we believe in ease of use and high-quality products, and we are committed to empowering users with the information and tools they need to succeed in cryptocurrency. Our upcoming crypto platform will revolutionize the industry and enhance the purchasing

SECURITY & SAFETY NETWORK

At Swap TC, the safety and security of our holders are our top priority. We strive to implement robust mechanisms and safeguards to protect their assets. Our decentralized autonomous organization (DAO) governance model allows for grassroots decision-making and emphasizes substance and quality over hype.

Furthermore, our data-coherence framework continuously monitors project data metrics in real-time and alerts users of any unusual activity. We believe in a holistic approach to security, stacking benefits and empowering investors to make informed decisions. Our commitment to transparency and accountability ensures the highest level of protection for your investment.

EVOLUTION

Swap TC is the result of a collaborative effort by a group of individuals with a shared vision. It takes courage and determination to create something unique and original, and that is exactly what we have done with Swap TC. Our innovative smart contract redefines how transaction fees are processed, offering a fresh and more efficient approach.

As we continue to evolve, Swap TC will challenge the status quo of mainstream listing companies and provide users with accurate and reliable data. We believe in empowering our users and putting their needs first, not using them for ad revenue.

ECOSYSTEM

The world of cryptocurrency is a vast and complex ecosystem, consisting of various stakeholders with different interests and motivations. At Swap TC, we aim to expand our ecosystem by developing innovative products that cater to a wide range of use cases, all accessible from a single platform.

Our hybrid approach combines the best of centralized and decentralized technologies, demonstrating the potential of digital currencies as a viable alternative to traditional government-issued currencies. By building a thriving and inclusive ecosystem, we aim to provide numerous benefits for current and future investors, fostering growth and innovation in the crypto space.

IMPACT

Swap TC is paving the way for a new era of economic exchange, where digital currencies play a central role. Our platform not only benefits crypto investors, but also brings value to people around the world. We are at the forefront of a major shift in the global financial system, as more and more people seek alternatives to traditional central banks and their ability to manipulate the money supply. Soon, fiat currencies will no longer be the only means of acquiring goods and services. With Swap TC, you can enjoy the security and convenience of peer-to-peer transactions without intermediaries.

Join us and be part of the future of finance.

1

PROBLEM - Initial Coin Offering

(ICOs) have faced a number of challenges in recent years, with many scams and fraudulent projects tarnishing the reputation of the industry.

This has made it difficult for genuine and innovative ICOs to succeed, as they often struggle to gain the trust and support of investors.

SOLUTION - Accountability

At Swap TC, we are dedicated to building trust and fostering relationships with our community, and we believe that our unique approach and proven track record set us apart from the competition.

2

PROBLEM - Raising Value

(ICOs) often face intense pressure to deliver quick results for their investors, which can lead to a focus on short-term gains over long-term sustainability.

This can create a dynamic where the project's community is more interested in the token's price than the progress of the product, putting pressure on the team to rush the release and sacrifice quality.

SOLUTION - Strong Foundation

At Swap TC, we understand the importance of building a strong and supportive community, and we prioritize the development of our products over short-term gains. We believe in taking the time to deliver a high quality product that meets the needs of our users and the market, and we are committed to transparency and accountability throughout the process.

3

PROBLEM - Product Completion

Unfortunately, there are many projects in the crypto space that launch without a clear vision or plan, which often leads to missed deadlines and incomplete products.

This not only disappoints investors, but also undermines the credibility and viability of the project.

SOLUTION - Achievable RoadMap

At Swap TC, we are committed to building a strong and sustainable project that delivers on our promises and meets the needs of our investors. We have a clear vision and roadmap, and we are dedicated to executing on our plans and achieving our goals. We believe that our focus on transparency and accountability, as well as our proven track record, sets us apart from other projects and makes us an attractive investment opportunity.

STRATEGY

Swap TC is a cryptocurrency project designed with the needs of investors in mind. Through thorough research and analysis, we have crafted a simple and effective structure that meets the demands of the market. We are committed to engaging with our community and fostering a strong connection with our investors, both old and new. Unlike many other crypto projects, Swap TC appeals to a broad and diverse audience, thanks to its versatile capabilities and upcoming products. Our ultimate goal is to reach as many people as possible and offer a platform that is useful for everyone, regardless of their level of experience with digital currencies.

At Swap TC, we have carefully considered the various blockchain networks available, and we have decided to build our platform on the Binance Smart Chain (BSC), a decentralized finance (DeFi) platform. There are several reasons for this decision, including the low transaction and gas fees on BSC, which make it an attractive option for decentralized platforms. In addition, BSC has a large and active user base, providing ample liquidity for our platform. We believe that the BSC network is well-suited to our needs and offers the best combination of features and benefits for our investors and users.

We have chosen to build our platform on the Binance Smart Chain (BSC) for several reasons, including the fact that Binance has the largest retail user base in the crypto industry and a significant capital reserve. The BSC network allows us to create our own decentralized applications (DApps) using smart contracts, and the compatibility with the Binance Chain enables seamless swapping of our tokens with other BEP-2 and BEP-8 tokens on the Binance Chain. Overall, we believe that the BSC network offers the best combination of features, benefits, and liquidity for Swap TC and our investors.

BSC

A DEFI PLATFORM

Swap TC is listed on PancakeSwap V2, a decentralized exchange that specializes in trading BEP-20 tokens. This is a popular and reliable platform for projects on the Binance Smart Chain (BSC), and we believe it is an excellent choice for our investors. We are committed to ensuring the security and safety of our tokens, and we are confident that PancakeSwap V2 provides the level of protection and support that our community deserves.

We also plan to explore listings on other popular exchanges to expand our reach and make Swap TC more accessible to a wider audience. We are excited to work with PancakeSwap and other exchanges to support the growth and success of our project.

Swap TC WEBSWAP

Swap TC will launch a webswap dApps platform, allowing users to buy, sell, and trade directly from the official website. This will provide a user-friendly environment for quick, easy, and secure trading, without the need for exchanges. The platform will protect user data and offer Swap TC tokens to compensate for miner and exchange fees.

Swap TC values its community and recognizes the importance of their support for the project. As such, the company will continue to provide high-quality development and products for its community, with the Webswap dApps serving as an example of its commitment to excellence.

Swap TC Finance (SF.TC)

Swap TC Finance is a self-serve platform that provides users with access to analytics, metrics, and key metadata about cryptocurrencies. Our goal is to empower users by providing them with accurate and transparent information about tokens, without any strings attached. The platform will be available 24/7 to support users in their data needs, and we will never impose volume-based listing restrictions or use a token's social media presence as a way to sell ads. Our focus is always on putting people first. With Swap TC Finance, you'll have a new place to check token prices and stay informed about the crypto market.

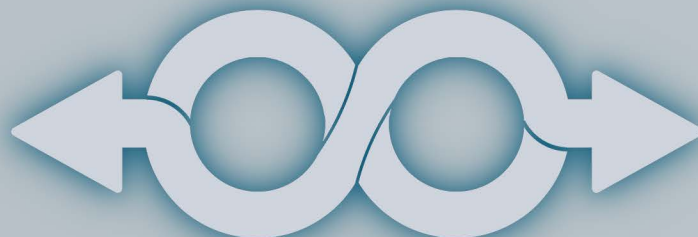

Portfolio Tracker SYNULO

Swap TC Synolo is a portfolio tracker that allows users to keep track of the assets linked to their wallet addresses. By safely inputting their crypto wallet address into our platform, users will be able to easily monitor the value of their assets. We are also developing a proprietary solution to address the issue of different apps and services reporting different prices for the same assets. This will ensure that users have accurate and reliable information about the value of their portfolio.

Privacy Tool Suite

Swap TC's privacy tool suite will help holders protect their personal data from being collected and potentially leaked by websites. Many users may not realize the vast amounts of data that websites can collect, so our tools will help prevent tracking and safeguard their information.

All holders of Swap TC will have access to the tool suite at no cost, as a benefit of holding our token. Investing in privacy is always a smart decision, and with our tools, you can browse the web with confidence knowing that your data is safe.

Swap TC Finance - BREAKDOWN

Swap TC is committed to providing accurate and accessible data for all tokens on Binance Smart Chain (BSC), including smaller tokens that may not receive as much attention. We believe that data accuracy is binary - it is either accurate or not - and it is our responsibility to ensure that data is accessible and reliable.

We reject the notion of data access privilege and believe that everyone has the right to accurate and transparent information about tokens, without any strings attached.

Additionally, we are concerned about the prevalence of hype-based investments and crypto scams in the industry, and believe that more needs to be done to combat these issues before government intervention becomes necessary.

We believe that the blockchain is a public ledger, and those in positions of power must do more to empower people and uphold the core principles of this technology.

Breakdown - Tokenomics & Reflections

Swap TC is the first crypto token to implement a tax system that rewards long-term holders on an individual basis. When you purchase \$SWAPTC, there is a 5% purchase fee. Sell and transfer fees start at 20% and then gradually decrease by 0.5% every week for 19 weeks. If you transfer \$SWAPTC to another wallet, the tax system will reset back to week zero for the receiving wallet.

In order to receive BNB (BEP20) reflections, you must hold at least 250 million \$SWAPTC. The amount and frequency of your BNB reflections will depend on the volume and amount of \$SWAPTC you hold. We recommend using our web-based reflections tracker, available on our website, to track your tax rate and redistribution.

Please see our graph on the next page for the transaction fee stats.

Corp, Staff Dividends & Deployer

The corporate wallet for Swap TC is divided into different liquidity pools to fund the development of the platform. In order to align the interests of the staff members with the success of the company, a commission-based salary system is implemented through a dividends contract. This contract allows the staff to receive reflections, but keeps the tokens locked for security reasons. Only the core team has access to the contract to add and remove staff members. If a staff member decides to leave Swap TC, the corporation will request to buy back the tokens to prevent a negative price impact.

The deployer wallet is exempt from fees and dividends, and will be used for future exchanges. To ensure the security and integrity of the platform, the core staff members who have access to important wallets have undergone Bronze Tier KYC verification by Reflex Finance, and a comprehensive KYC verification with AnonyDoxx for the entire team.

Total Supply: 1 Trillion

The tax system that has been implemented was influenced by a concept in physics known as the Center of Mass Formula. This formula states that the product of the total mass of a system and the position vector of the center of mass is equal to the sum of the products of the masses of the individual particles in the system and their respective position vectors. Essentially, the center of mass of a system is determined by the distribution of mass within that system.

NOTICE: IF YOU TRANSFER YOUR TOKENS TO A NEW WALLET, THE TIMELINE WILL RESET BACK TO WEEK ZERO FOR THE NEW WALLET THAT'S HOLDING THE SWAP TC TOKENS.

Taxes and slippage will vary on the holder's hold time. Our system rewards loyalty on an individual basis as opposed to global taxation models

DISCLAIMER

Slippage, or the difference between the expected price of a trade and the actual price at which the trade is executed, can be quite high for those trying to sell during a high tax week. This is because slippage is affected by various factors, including liquidity, price impact, and the amount of tax being charged. In general, slippage will be higher when liquidity is low, price impact is high, and tax fees are high.

During a high tax week, slippage is typically between 12% and 40%. However, it is important to note that this range is just an estimate, and actual slippage may vary depending on market conditions. Over time, slippage is expected to gradually decrease as liquidity increases and tax fees decrease. For example, the estimated slippage for Week 19 is 12% to 18%. Buy slippage is also estimated to be around 12%.

It is important for traders to be aware of slippage and to take it into account when planning their trades. By understanding how slippage is affected by different factors, traders can make informed decisions about when and how to execute their trades in order to minimize slippage and maximize the efficiency of their trading strategy.

Disclaimer: These timelines are strategically elongated to meet realistic milestones. It wouldn't be fair for our investors to be impacted adversely by the state of the world's financial markets.

Frequently Asked Questions (FAQ)

Q What is the total supply?

A 1 Trillion (1,000,000,000,000)

Q How many developer wallets are there?

A Deployer, Corporate, and Team Dividends.
Reference: 2022 Whitepaper Pg.8

Q What is the initial price/rate?

A 1 BNB / 500,000,000 SWAPTC (0.5B)

Q What are the tokenomics?

A Buy: 5% (Slippage 10-12%)
Sell/Transfer: (20%/10.5%|Week 0/19)
Slippage (40%-12%)

Q What happens if I transfer tokens to another wallet after the initial purchase?

A If you transfer tokens to a different wallet the tax rate will reset back to week zero because the smart contract won't recognize the new wallet's time-stamp.

Q If I buy at launch, I know that if I sell whenever, my 19th-week tax rate resets, but say I get down to the 10th week and I buy more. Will my 19th-week wait time start over to zero week?

A If you transfer your tokens to a new wallet, only the receiver (i.e., the new wallet) will experience a reset in the timeline for the vesting of their tokens. It is important to note that this reset will not be a complete reset to week zero, but rather will be an averaging of the timing between the receiver's first purchase and the most recent purchase.

$$\text{New Time} = \frac{(\text{Initial Amount} * \text{Original Time}) + (\text{New Coins} * \text{Current Time})}{(\text{Total Coins})}$$

Q Is the team doxxed/KYC'd?

A Bronze Tier KYC verification by Reflex Finance, and a comprehensive KYC verification with AnonyDoxx for the entire team.

Q What is the minimum to receive reflections?

A 250 Million to receive BNB (BEP20)

Q When/was the Presale?

A Presale: Aug 12th, 2022 on the Reflex Finance Launchpad. Swap TC is tradable on Pancake - Swap and Reflex Swap as of August 20th, 2022.

Q Did you complete an audit?

A We've completed our smart contract's audit with InterFI. It is available on our website (swaptc.com).

Q Why should we invest into Swap TC?

A At Swap TC, we prioritize the needs and interests of our users above all else. This means that we will never treat our users as a product to be exploited for profit. Instead, we believe in putting the user first and making sure that they are treated fairly and with respect. We believe that this is the key to building a strong and sustainable community, and we are dedicated to upholding this principle in everything we do.

Q How will long-term holders benefit by holding the Swap TC Token?

A At Swap TC, we believe that our unique three-pronged approach to rewarding holders - through reflections, governance, and platform functionality - can only be supported by a stable token. We understand that the market can be volatile and unpredictable, and we want to make sure that our holders are protected against difficult market conditions and traders who might try to manipulate the intended utility of the token. To achieve this stability, we believe it is important to focus on the collective benefits and rewards for the entire community, rather than on revenue from a corporate perspective. Our primary objective as a decentralized autonomous organization (DAO) is to ensure that our community is supported and rewarded, and we are committed to doing everything we can to achieve this goal.

Frequently Asked Questions (FAQ)

Q What utilities will Swap TC have?

A Reflections Tracker, Swap TC Finance, Listing Platform, WebSwap, and an All-In-One App. Those are the main utilities we currently prioritize.

Q Reflections Tracker?

A RT is easy to use and can be accessed by either connecting a wallet or manually inputting an address. This utility is simple but critical for helping users understand their positions within the Swap TC ecosystem and make informed decisions about their holdings. Overall, we believe that the RT is a valuable resource for our community and are excited to see how it is used to support the success of our ecosystem.

Q Swap TC Finance?

A Our goal is to empower our users with the metrics they need to make informed investment decisions, and we believe that SF.TC (our data platform) is an essential tool for achieving this goal. By formatting the data in a way that is easy to understand and making it readily accessible to users, we hope to bring transparency and ease of use to our ecosystem.

Simple: Price, Marketcap, Liquidity, Decimals, and Tax

Advanced: Available Supply, Circulating, Remaining, Burned, Locked, Global, and Individual Reflections

Q Swap?

A We are planning to add additional functions to WebSwap that will benefit our users, such as covering gas fees up to a certain extent for those who are holding or purchasing a certain amount of Swap TC. This is just one example of the ways in which we are working to create a user-friendly and supportive platform for our community.

Q SafeMarketCap?

A SMC (our market data platform) will be web and mobile app-based and will focus on providing relevant and accurate token data to our users. We are committed to empowering investors with the tools they need to make informed investment decisions, and we believe that SMC is a key part of this effort. We understand that investing in a project without access to data and graphs can be like gambling at a casino, and we want to provide our users with the resources they need to conduct their own research (DYOR) and determine whether an investment is wise. That is why we have established a number of principles for Swap TC, including data coherence, data integrity, and data for all.

We are proud of all of the products that we release at Swap TC, but we are especially proud of SMC and the role it plays in empowering our users. We believe that data is the truth, and we are committed to providing our users with the information they need to make informed decisions. In contrast to mainstream listing platforms, which often prioritize ads and hype over providing coherent data, we believe that our users should always be our top priority.

Q Will there be any marketing for Swap TC?

A Overall, our marketing plan is designed to highlight the unique value proposition of Swap TC and its potential to make a positive impact on the crypto industry. We are excited to share our vision with the world and believe that our marketing efforts will be an important part of our long-term success.

MEET THE TEAM

Vlad D.
Chief Executive Officer

As a dedicated member of the United States Air Force, I have had the privilege of serving as a first responder for the past several years. In this role, I have learned the importance of quick thinking, problem-solving, and collaboration in times of crisis.

In addition to my responsibilities as a first responder, I am also committed to improving the crypto space through my work with the Swap TC community. I have taken on a leadership role in the development of use-case tools that will benefit not only the Swap TC community, but also other communities in the crypto space.

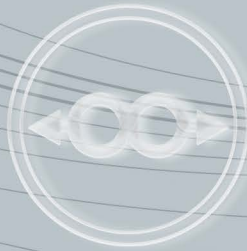

With five years of leadership experience under my belt, I am confident in my ability to guide Swap TC on a successful journey. I am committed to working hard, listening to the needs of the community, and leading by example in order to drive progress and growth for all involved.

Sherif M.
Chief Technology & Financial Officer

Veteran - Signals Intelligence Specialist - 16 years
Computer Science, University of Northern British Columbia

Former Senior Analyst at a Fortune 500 Company,
with over 20 years of experience leading analytical
consumables development and delivery.

Alex T.
Chief Security Officer

Veteran - Signals intelligence specialist- 14 years
CNDA - Computer Network Defence Analyst for DND

10 years of CNE & CEH operations
(Computer Network Exploitation & Certified Ethical Hacker)
University of Ottawa CyberSec

We are a team with a combination of 50+ years of business, engineering, information technology, and analysis experience.

We are well equipped to tackle a wide range of challenges due to our diverse set of skills and expertise, allowing us to approach problems from multiple angles and find creative solutions.
