Turnkey Solutions for Halal Certification

About Halal Research Council

Halal Research Council is an organization working globally on Halal certifications in order to cater the needs of food and nutrition agencies and side by side non-food agencies especially in the FMCG sectors.

Halal Research Council certifies the products under the reverent coordination of recognized Shariah Supervisory Board, Highly qualified Food Technologists, Chemical Engineers and R&D professionals in respect of eligibility for Certification through research based methodology scrutinizing the sources of ingredients, examining the entire supply chain, chemical examination and analyzing Shariah prospects of ingredients used in the products.

As the awareness of Food and Nutrition is rising in the masses so ultimately there is a developing need of such certifications. Halal Research Council is honored to serve Halal foods and non-food market all over the world. The ingredients used in preparation of the products are usually mentioned clearly on the wrappers/packaging but often their sources are not mentioned with them. As it is legally required and being the first right of the customers, they should be well aware of the items and materials used in the process.
